AUTHOR INDEX

Under each name are listed, in chronological order of publication, all articles in which an author has participated.

Abramovitch, R. A.
Aromatic substitution. Part VIII. Some aspects of the mechanism of the Tschitschibabin reaction. R. A. Abramovitch, F. Helmer, and J. G. Saha, 725.
Aromatic substitution. Part IX. On the mechanism of the Pschorr cyclization. R. A. Abramovitch and G. Tertzakian, 940.
Some comments on Craig's rules. R. A. Abramovitch and K. L. McEwen, 2616.
Stereochemistry of the reduction of cyclic ketones with the pyridine-*n*-butyllithium adduct: steric approach and product development controls. R. A. Abramovitch, W. C. Marsh, and J. G. Saha, 2631.
The reaction of sulfonylimido intermediates with aromatic compounds. R. A. Abramovitch, J. Roy, and V. Uma, 3407.
Arylation of aromatic compounds with benzenediazonium borofluoride. Nature of the arylating species. R. A. Abramovitch and J. G. Saha, 3269.
Abshire, C. J.
Synthesis of α-alkyl-substituted amino acids and derivatives. C. J. Abshire and L. Berlinguet, 1232.
Abson, D.
The reaction of unsaturated carbohydrates with carbon monoxide and hydrogen. IV. Structure and stereochemistry of anhydrodeoxyheptitols from 3,4,6-tri-*O*-acetyl-D-galactal. A. Rosenthal and D. Abson, 1985.
Synthesis of anhydrodideoxyhexitols related to anhydrodeoxyhexitols from oxo reaction of 3,4-di-*O*-acetyl-D-xylal. A. Rosenthal and D. Abson, 1318.
Achmatowicz, O., Jr.
Chasmanine and its structure. O. Achmatowicz, Jr., Y. Tsuda, L. Marion, T. Okamoto, M. Natsume, H.-H. Chang, and K. Kajima, 825.
The structure of homochasmanine. O. Achmatowicz, Jr. and L. Marion, 1093.
The oxidation of diterpenoid alkaloids. O. Achmatowicz, Jr., Y. Tsuda, and L. Marion, 2336.
Adams, G. A.
Structural features of two extracellular polysaccharides from *Serratia marcescens*. R. Young and G. A. Adams, 2929.
Constitution of an extracellular acidic glucomannan from *Serratia marcescens*. G. A. Adams and R. Young, 2940.
Adel, R. E.
Photochemical transformations of some 4′-amino-2-styrylpyridines and their salts. J. L. R. Williams, J. M. Carlson, R. E. Adel, and G. A. Reynolds, 1345.
Agarwala, U.
Sulfur isotope effects in the hydrogen ion decomposition of thiosulfate. U. Agarwala, C. E. Rees, and H. G. Thode, 2802.
Ahmad, Y.
Quinoxaline derivatives. VIII. The effect of electron-donating groups on the formation of certain quinoxalinecarboxyanilide *N*-oxides and their rearrangement. Y. Ahmad, M. S. Habib, M. Iqbal, M. I. Qureshi, and Ziauddin, 3424.
Ainsworth, C.
Isomeric sydnones. I. The reactions of 1- and 2-benzoyl-1-methylhydrazines and phosgene. C. Ainsworth, 1607.
Alaimo, R. J.
Nucleophilic addition of triethylamine to dimethyl acetylenedicarboxylate. R. J. Alaimo and D. G. Farnum, 700.
Alam, S. N.
Demjanov rearrangement of 9-xanthenemethylamine. S. N. Alam and D. B. MacLean, 3433.
Alcala, A.
A chemical study of *Bocconia latisepala* Wats. X. A. Dominguez, J. G. Delgado, A. Monroy C., L. G. Armendariz, A. Alcala, J. Quevedo, and P. Rojas, 679.
Allen, A. D.
Hydrolysis constants of some platinum(II) chloro complexes containing unsaturated ligands. A. D. Allen and T. Theophanides, 290.
Infrared spectra of tris-ethylenediamine complexes of ruthenium(II). A. D. Allen and C. V. Senoff, 888.
Allen, C. F. H.
The pyrolysis of oximes of some gamma cyano- and gamma nitro-ketones. C. F. H. Allen, 2486.
Allen, W. F.
Erratum: Primary process studies by monoisotopic photosensitization on the reactions of Hg $6(^3P_1)$ atoms with alkyl chlorides. J. K. S. Wan, O. P. Strausz, W. F. Allen, and H. E. Gunning, 318.
Alexander, W. A.
The thermodynamic properties and phase diagram of the gold–cadmium system by the isopiestic method. L. J. Bartha and W. A. Alexander, 2319.
Altshuller, A. P.
Kinetics of vapor-phase hydrocarbon–ozone reactions. J. J. Bufalini and A. P. Altshuller, 2243.

Alyea, E. C.
The reaction of some titanium and zirconium halides with cyclic organic ligands containing oxygen and sulfur. E. C. Alyea and E. G. Torrible, 3468.
Amin, J. H.
A new synthesis of alkyl fluorides. The pyrolysis of 2-alkylpseudouronium fluorides and fluoroborates. J. H. Amin, J. Newton, and F. L. M. Pattison, 3173.
Anantaraman, R.
Electrophilic catalysis in solvolytic reactions. VII. Solvent effect. R. Anantaraman and K. Saramma, 1770.
Anderson, A.
Raman spectrum of crystalline and liquid SO_3. A. Anderson and R. Savoie, 2271.
Anderson, C. D.
The adsorption of krypton and ethylene on evaporated films of magnesium. D. M. Young and C. D. Anderson, 309.
Anderson, H. J.
Pyrrole chemistry. IV. The preparation and some reactions of brominated pyrrole derivatives. H. J. Anderson and S.-F. Lee, 409.
The nature of association between molecules of N-methylpyrrole. H. J. Anderson, 2387.
Anet, F. A. L.
Studies in the Wagner–Meerwein rearrangement. Part V. Rates of formolysis of some 9-alkyl-9-fluorenylmethyl tosylates. F. A. L. Anet and P. M. G. Bavin, 2465.
Antia, N. J.
The optical activity of fucoxanthin. N. J. Antia, 302.
Antkowiak, W.
Isopimaric acid. W. Antkowiak, O. E. Edwards, R. Howe, and J. W. ApSimon, 1257.
ApSimon, J. W.
Isopimaric acid. W. Antkowiak, O. E. Edwards, R. Howe, and J. W. ApSimon, 1257.
The stereochemistry of the tetrahydropimaric acids. J. W. ApSimon, P. V. Demarco, and J. Lemke, 2793.
Armendariz, L. G.
A chemical study of *Bocconia latisepala* Wats. X. A. Dominguez, J. G. Delgado, A. Monroy C., L. G. Armendariz, A. Alcala, J. Quevedo, and P. Rojas, 679.
Armstrong, D. A.
Erratum: Effects of pH in the γ-radiolysis of aqueous solutions of cysteine and methyl mercaptan. D. A. Armstrong and V. G. Wilkening, 993.
Armstrong, W. A.
A l.e.t. independent dosimeter based on the chemiluminescent determination of H_2O_2. W. A. Armstrong and W. G. Humphreys, 2576.
Arsenault, G. P.
The identity of oxyjavanicin with fusarubin. G. P. Arsenault, 2423.
Atkinson, J. G.
Synthesis of isotopically labelled olefins via the Wittig reaction. J. G. Atkinson, M. H. Fisher, D. Horley, A. T. Morse, R. S. Stuart, and E. Synnes, 1614.
Ayer, W. A.
Structural studies by mass spectrometry. Determination of the structure of lycofawcine (base L). W. A. Ayer, W. R. Bowman, P. Kebarle, and R. H. Burnell, 328.
The oxidation of methyl fumaropimarate with lead tetraacetate. W. A. Ayer and C. E. McDonald, 1429.
Ayscough, P. B.
Spectroscopic studies of the reversible reaction between 2,2-diphenyl-1-picrylhydrazyl and 2,4,6-tri-*t*-butylphenol. P. B. Ayscough and K. E. Russell, 3039.
Baboian, R.
Electrochemical studies on titanium in molten LiCl–KCl eutectic. R. Baboian, D. L. Hill, and R. A. Bailey, 197.
Back, M. H.
The reactions of methylene radicals with acetaldehyde and propionaldehyde. M. H. Back, 106.
Back, R. A.
Reactions of imino radicals with hydrocarbon gases. J. L. Brash and R. A. Back, 1778.
The reaction of active nitrogen with mixtures of ethylene and nitric oxide. E. Fersht and R. A. Back, 1899.
The determination of the saturation vapor pressure of solid hydroxylamine using a piston pressure gauge. R. A. Back and J. Betts, 2157.
The photolysis and the mercury-photosensitized decomposition of hydroxylamine vapor. J. Betts and R. A. Back, 2678.
Bader, R. F. W.
The chemistry of singlet and triplet methylene. R. F. W. Bader and J. I. Generosa, 1631.
Baer, H. H.
Concerning the existence of 2-(2-nitrovinyl)benzoic acid. A contribution to the alkaline elimination in β-substituted nitro compounds. H. H. Baer and F. Kienzle, 190.
A novel synthesis for aminodideoxy sugars. 3-Amino-2,3-dideoxy-D-*arabino*-hexose. H. H. Baer and T. Neilson, 840.
Reactions of nitro sugars. I. Some benzylidene and acyl derivatives of methyl 3-deoxy-3-nitro-D-hexopyranosides. H. H. Baer, F. Kienzle, and T. Neilson, 1829.
Synthesis of 3-amino-2,3-dideoxy-D-*lyxo*-hexose. H. H. Baer and F. Kienzle, 3074.
Reactions of nitro sugars. II. The conversion of methyl 6-deoxy-6-nitrohexopyranosides into deoxynitroinositols by alkaline glycoside cleavage. H. H. Baer and W. Rank, 3330.

Reactions of nitro sugars. III. Instability of 6-deoxy-6-nitro-aldohexoses at intermediate pH values. H. H. Baer and W. Rank, 3462.

Bailey, R. A.
Electrochemical studies on titanium in molten LiCl–KCl eutectic. R. Baboian, D. L. Hill, and R. A. Bailey, 197.

Baker, A. W.
Enthalpies of intramolecular halogen–hydroxyl interactions. A. W. Baker and A. T. Shulgin, 650.

Baker, D. E.
Complexes of stannic iodide with aromatic hydrocarbons. J. F. Murphy and D. E. Baker, 1272.

Balakrishnan, P. V.
Chemistry of the complexes of uranyl and plutonyl ions with organic ligands. P. V. Balakrishnan, S. K. Patil, H. D. Sharma, and H. V. Venkatasetty, 2052.

Balasubramanian, A.
Light absorption studies. Part XXI. The ultraviolet and infrared absorption of *o*-alkyl- and *o,o'*-dialkyl-substituted anisoles. A. Balasubramanian, J. C. Dearden, W. F. Forbes, and (in part) N. F. Cheetham, 2603.

Baldwin, M. J.
Concerning the preparation of *p*-allylphenol from safrole by sodium – liquid ammonia reduction. M. J. Baldwin and R. K. Brown, 2621.

Baliga, B. T.
Effect of pressure and temperature on the rate of the acid-catalyzed hydration of ethylene. B. T. Baliga and E. Whalley, 2453.

Bannard, R. A. B.
Paper chromatography of some amine hydrochlorides and acetates in acidic solvent systems. R. A. B. Bannard and A. A. Casselman, 395.
Cyclohexane compounds. V. The reaction of 1-methoxycyclohexene-2 with aqueous N-bromosuccinimide. The 1-methoxy-2-bromo-3-hydroxycyclohexanes. R. A. B. Bannard, A. A. Casselman, and L. R. Hawkins, 2398.
Preparation of antidotes for anticholinesterase poisoning. III. Esters of 1-arylcycloalkanecarboxylic acids. J. H. Parkkari, R. A. B. Bannard, and I. W. Coleman, 3119.

Barclay, L. R. C.
9,10-Dimethyl- and 9,10-diphenyl-9,10-dihydro-9,10-ethanoanthracene by Friedel–Crafts cyclialkylations of 1,4-diarylsubstituted-1,4-diols. L. R. C. Barclay and R. A. Chapman, 1754.

Barclay, R., Jr.
Preparation of 4,4''-bis(diphenylamines) by the Chapman rearrangement. R. Barclay, Jr., 2125.

Barlow, C. A., Jr.
Thermal stability of an adsorbed array of charges in the Einstein approximation. J. R. Macdonald and C. A. Barlow, Jr., 2985.

Barradas, R. G.
Considerations of adsorbed ionic intermediates on the AgO/Ag_2O electrode in aqueous alkaline solution. R. G. Barradas and G. H. Fraser, 446.
Chemical structure and adsorption of organic molecules at the polarized mercury–electrolyte interface. R. G. Barradas and P. G. Hamilton, 2468.

Barrer, R. M.
Slip flow in long, single capillaries. Part II. Steady-state flow and specular reflection. R. M. Barrer and D. Nicholson, 896.
Slip flow in long, single capillaries. Part III. The transient state of flow. R. M. Barrer and D. Nicholson, 913.

Bartha, L. J.
The thermodynamic properties and phase diagram of the gold–cadmium system by the isopiestic method. L. J. Bartha and W. A. Alexander, 2319.

Bartholomew, R. F.
The flow of gases through microporous carbon. R. F. Bartholomew and E. A. Flood, 1968.

Battersby, A. R.
The alkaloids of papaveraceous plants. LIV. The structure of eschscholtzine. R. H. F. Manske, K. H. Shin, A. R. Battersby, and D. F. Shaw, 2183.

Bauer, R. F.
The mono-oxalato complexes of iron(III). Part I. Equilibria. R. F. Bauer and W. MacF. Smith, 2755.
The mono-oxalato complexes of iron(III). Part II. Kinetics of formation. R. F. Bauer and W. MacF. Smith, 2763.

Baum, M. E.
Isomeric 1,3-cyclopentanedicarboxylic acids from the oxidative ozonization of norbornene. S. C. Temin and M. E. Baum, 705.

Bavin, P. M. G.
Studies in the Wagner–Meerwein rearrangement. Part V. Rates of formolysis of some 9-alkyl-9-fluorenylmethyl tosylates. F. A. L. Anet and P. M. G. Bavin, 2465.
Aliphatic chemistry of fluorene. Part X. 2-Phenylindolenine-3-spiro-9'-fluorene. P. M. G. Bavin, 2919.

Bayley, C. H.
Localization of the C=Se vibration in the infrared spectra of selenosemicarbazones. B. A. Gingras, T. Suprunchuk, and C. H. Bayley, 1650.

Beeckmans, J. M.
Numerical solutions of Smoluchowski's equations for the coagulation of uncharged aerosols. J. M. Beeckmans, 2312.

Beg, M. A. A.
Spectroscopic studies of organophosphorus compounds. Part I. The constitution of alkylphosphine – carbon disulfide adducts. M. A. A. Beg and M. S. Siddiqui, 608.
Bell, G. M.
The diffuse layer correction to the discrete-ion effect in electric double layer theory. S. Levine, J. Mingins, and G. M. Bell, 2834.
Bellas, M. G.
The Hg $6(^3P_1)$ photosensitization of chlordifluoromethane. M. G. Bellas, O. P. Strausz, and H. E. Gunning, 1022.
Belleau, B.
Stereospecific synthesis of a dibenzo[*a,g*]quinolizine analog of 18-hydroxyalloyohimbane. B. Belleau and D. Dvornik, 2545.
Stereoselective synthesis of a dibenzo[*a,g*]quinolizine analog of 18-hydroxyepialloyohimbane. B. Belleau and J. Puranen, 2551.
Benn, M. H.
The synthesis of glucosinalbin and glucoaubrietin. M. H. Benn, 1.
Glucoputranjivin. M. H. Benn and D. Meakin, 1874.
Bennett, J. E.
An adiabatic solution calorimeter used for measuring the molar excess enthalpy of the system carbon tetrachloride – benzene at 25 °C. J. E. Bennett and G. C. Benson, 1912.
Bennett, O. F.
Synthesis and reactivity of some ortho-substituted diphenyl sulfones. O. F. Bennett, 1880.
Benoiton, L.
An improved synthesis of ε-N-acetyl-L-lysine and similar compounds. L. Benoiton and J. Leclerc, 991.
Erratum: Amino acids and peptides. II. Synthesis of ε-*N*-methyl-L-lysine and related compounds. L. Benoiton, 993.
Benson, G. C.
An adiabatic solution calorimeter used for measuring the molar excess enthalpy of the system carbon tetrachloride – benzene at 25 °C. J. E. Bennett and G. C. Benson, 1912.
Some heats of solution in light and heavy water. D. H. Davies and G. C. Benson, 3100.
Berlinguet, L.
Synthesis of α-alkyl-substituted amino acids and derivatives. C. J. Abshire and L. Berlinguet, 1232.
Bernstein, H. J.
A simplified procedure for the analysis of complex nuclear magnetic resonance spectra. I. The principles of sub-spectral analysis. P. Diehl, R. G. Jones, and H. J. Bernstein, 81.
A simplified procedure for the analysis of complex nuclear magnetic resonance spectra. II. The analysis of symmetrical trifluorobenzene, the AA'A''XX'X'' system. R. G. Jones, R. C. Hirst, and H. J. Bernstein, 683.
Addendum: A simplified procedure for the analysis of complex nuclear magnetic resonance spectra. I. The principles of sub-spectral analysis. P. Diehl, R. G. Jones, and H. J. Bernstein, 1891.
Berse, C.
Synthèses de peptides contenant des thioacides. C. Berse and G. Dupuis, 2174.
Bessette, F.
The preparation of thioacetals from orthothioboric esters. F. Bessette, J. Brault, and J. M. Lalancette, 307.
Betts, J.
The determination of the saturation vapor pressure of solid hydroxylamine using a piston pressure gauge. R. A. Back and J. Betts, 2157.
The photolysis and the mercury-photosensitized decomposition of hydroxylamine vapor. J. Betts and R. A. Back, 2678.
Bevan, J. A.
cis–trans Isomerism in 2-arylidene-3,3-diphenylindan-1-ones. J. A. Bevan, P. E. Gagnon, and I. D. Rae, 2612.
Bevill III, R. D.
Mechanism of action of UDPGal-4-epimerase: isotope effect studies. R. D. Bevill III, E. A. Hill, F. Smith, and S. Kirkwood, 1577.
Bhattacharjee, S. S.
A study of the pectin present in the bark of amabilis fir (*Abies amabilis*). S. S. Bhattacharjee and T. E. Timell, 758.
Birchall, T.
Nuclear magnetic resonance studies of the protonation of weak bases in fluorosulfuric acid. V. Ketones, carboxylic acids, and some other oxygen bases. T. Birchall and R. J. Gillespie, 1045.
Nuclear magnetic resonance spectroscopy of some selenium compounds. T. Birchall, R. J. Gillespie, and S. L. Vekris, 1672.
Bird, R. A.
The effect of phenols on the polymerization of vinyl acetate. R. A. Bird and K. E. Russell, 2123.
Birss, F. W.
Semiempirical SCF–LCAO–MO treatment of thiophene, furan, and pyrrole. N. Solony, F. W. Birss, and J. B. Greenshields, 1569.
Bishop, C. T.
The water-soluble polysaccharides of dermatophytes. IV. Galactomannans I from *Trichophyton granulosum, Trichophyton interdigitale, Microsporum quinckeanum, Trichophyton rubrum,* and *Trichophyton schönleinii.* C. T. Bishop, M. B. Perry, F. Blank, and F. P. Cooper, 30.

Glycosidation of sugars. III. Gas–liquid chromatography of the methyl glycosides of D-galactose, D-glucose, and D-mannose as their trimethylsilyl ethers. V. Smirnyagin, C. T. Bishop, and F. P. Cooper, 3109.
Fractionation of pectins from sunflowers, sugar beets, apples, and citrus fruits. V. Zitko and C. T. Bishop, 3206.

Blackwood, R. K.
Some transformations of tetracycline at the 4-position. R. K. Blackwood and C. R. Stephens, 1382.

Blades, A. T.
The photolysis of cyclopentanone and cyclobutanone. R. F. Klemm, D. N. Morrison, P. Gilderson, and A. T. Blades, 1934.

Blanchard, H. S.
Autoxidation reactions catalyzed by cobalt acetate bromide. A. S. Hay and H. S. Blanchard, 1306.

Blank, F.
The water-soluble polysaccharides of dermatophytes. IV. Galactomannans I from *Trichophyton granulosum*, *Trichophyton interdigitale*, *Microsporum quinckeanum*, *Trichophyton rubrum*, and *Trichophyton schönleinii*. C. T. Bishop, M. B. Perry, F. Blank, and F. P. Cooper, 30.

Blears, D. J.
Hindered internal rotation in boron halide complexes of N,N-dimethylformamide. E. S. Gore, D. J. Blears, and S. S. Danyluk, 2135.

Blonda, D. S.
Antineoplastic agents. XV. Intramolecular reactions of N-phenyl-N′-bis(2-chloroethyl)urea. G. R. Pettit, D. S. Blonda, and R. A. Upham, 1798.

Bloor, J. E.
Theoretical studies on the electronic spectra of substituted aromatic molecules. Part III. Semiempirical SCF calculations for polycyclic alternant hydrocarbons. J. E. Bloor and N. Brearley, 1761.
Semiempirical SCF calculations on azulene and its singly charged ions. J. E. Bloor, 3026.

Bonnett, R.
Studies in the pyrroline series. V. 3,3-Dimethyl-1-pyrroline-1-oxide. R. Bonnett, S. C. Ho, and J. A. Raleigh, 2717.

Bowden, K.
The acidity of some substituted acetonitriles. R. Stewart, J. P. O'Donnell, and K. Bowden, 1225.
The H_- function in aqueous alcohols containing base. K. Bowden, 2624.
The transmission of polar effects. Part II. The kinetics of esterification with diazodiphenylmethane and the ionization of 3-substituted acrylic acids. K. Bowden, 3354.

Bowman, W. R.
Structural studies by mass spectrometry. Determination of the structure of lycofawcine (base L). W. A. Ayer, W. R. Bowman, P. Kebarle, and R. H. Burnell, 328.

Bradley, D. C.
Structures of mercury mercaptides. Part II. X-ray structural analysis of mercury ethylmercaptide. D. C. Bradley and N. R. Kunchur, 2786.

Brash, J. L.
Reactions of imino radicals with hydrocarbon gases. J. L. Brash and R. A. Back, 1778.

Brault, J.
The preparation of thioacetals from orthothioboric esters. F. Bessette, J. Brault, and J. M. Lalancette, 307.

Brearley, N.
Theoretical studies on the electronic spectra of substituted aromatic molecules. Part III. Semiempirical SCF calculations for polycyclic alternant hydrocarbons. J. E. Bloor and N. Brearley, 1761.

Breck, W. G.
Entropy differences for some related pairs of complex ions. J. Lin and W. G. Breck, 766.

Brisse, F.
Determination of the crystal structure of erbium titanate, $Er_2Ti_2O_7$, by X-ray and neutron diffraction. O. Knop, F. Brisse, L. Castelliz, and Sutarno, 2812.

Brodman, B. W.
Urea inclusion compounds of alkenoic acids and alkyl alkenoates. J. Radell and B. W. Brodman, 304.
X-ray powder patterns for the identification of some *n*-alkanone semicarbazones. J. Radell, B. W. Brodman, and K. Kramer, 1661.

Brook, A. G.
Spectral properties of *p*-substituted benzoyltriphenylsilanes. A. G. Brook, R. Kivisikk, and G. E. LeGrow, 1175.

Brouillard, J.
Étude des effets électrostatiques sur le mécanisme d'action catalytique de la phosphatase alcaline intestinale de veau. M. Lazdunski, J. Brouillard, and L. Ouellet, 2222.

Brown, A. C. R.
The reactivity of the cyclic polyenes towards free radicals. II. Metathesis with the ethyl radical. A. C. R. Brown and D. G. L. James, 660.
Reactions of the ethyl radical. VI. Addition to conjugated dienes. A. C. R. Brown and D. G. L. James, 1102.
The reactivity of the cyclic polyenes towards free radicals. III. Addition of the ethyl radical. A. C. R. Brown and D. G. L. James, 1110.

Brown, G. R.
The reactions of 2-methyl ethylenimine and azacyclobutane with atomic hydrogen. J. W. S. Jamieson, G. R. Brown, and W. K. Hancock, 1973.
Possible calorimetric method for measurement of the ligand field splitting energies for the hexaaquo

cations of some transition elements. J. W. S. Jamieson, G. R. Brown, D. W. Gruener, R. V. Peiluck, and R. A. LaMontagne, 2148.
High energy modifications of the hydrates of zinc sulfate. J. W. S. Jamieson, R. A. LaMontagne, B. A. Pattern, and G. R. Brown, 3129.

Brown, I.
Reaction of dihydropyran with ethyl azidoformate. I. Brown and O. E. Edwards, 1266.

Brown, R. K.
Hydrogenolysis by $AlCl_3$–$LiAlH_4$ of ether solutions of *cis* and *trans* isomers of 2,4-disubstituted-1,3-dioxolanes. B. E. Leggetter and R. K. Brown, 1030.
The preparation of 3-alkylthioindoles. R. V. Jardine and R. K. Brown, 1293.
Anomalous reactions in attempts to prepare 3-alkylthioindoles. R. V. Jardine and R. K. Brown, 1298.
Concerning the preparation of *p*-allylphenol from safrole by sodium – liquid ammonia reduction. M. J. Baldwin and R. K. Brown, 2621.

Brown, R. T.
Some aspects of the chemistry of catharanthine and cleavamine. J. P. Kutney, R. T. Brown, and E. Piers, 1545.

Browne, R. J.
The yield of singlet oxygen in the reaction of chlorine with hydrogen peroxide. R. J. Browne and E. A. Ogryzlo, 2915.

Brownstein, S.
Complexes of boron trifluoride with fluoborates. S. Brownstein and J. Paasivirta, 1645.

Bryce, W. A.
Surface effects in the uninhibited and the inhibited pyrolyses of isomeric hexanes. Parts I–III. *n*-Hexane, 2-methyl pentane, 3-methyl pentane. J. Chrysochoos and W. A. Bryce, 2092.
Surface effects in the uninhibited and the inhibited pyrolyses of isomeric hexanes. Part V. 2,2-Dimethyl butane (neohexane). J. Chrysochoos and W. A. Bryce, 2457.

Buchanan, R. L.
The synthesis of α-monofluoroalkanoic acids. F. L. M. Pattison, R. L. Buchanan, and F. H. Dean, 1700.
Preparation of α-fluoro-γ-aminoacids. R. L. Buchanan and F. L. M. Pattison, 3466.

Buchwald, M.
Conformational studies on synthetic poly-α-amino acids: the helical sense of poly-L-tryptophan: optical rotatory dispersion studies. G. D. Fasman, M. Landsberg, and M. Buchwald, 1588.

Bufalini, J. J.
Kinetics of vapor-phase hydrocarbon–ozone reactions. J. J. Bufalini and A. P. Altshuller, 2243.

Bullock, E.
β-Aminocrotononitrile. I. Geometrical isomerism and some reactions. E. Bullock and B. Gregory, 332.
Nuclear magnetic resonance spectra and conductivities of some metal acetylacetonates. A. J. Carty, D. G. Tuck, and E. Bullock, 2559.

Bunbury, D. L.
Conditions for the photochemical nitration of benzene. D. L. Bunbury, 1714.

Buncel, E.
Solvolysis of alkyl chlorosulfates. Part I. Reaction of *n*-propyl chlorosulfate with nucleophiles. E. Buncel and J. P. Millington, 547.
Hydrolysis of a series of primary alkyl chlorosulfates: entropy of activation as a criterion of fragmentation in solvolytic reactions. E. Buncel and J. P. Millington, 556.
The Wallach rearrangement. Part II. Kinetics and mechanism of the acid-catalyzed rearrangement of azoxybenzene. E. Buncel and B. T. Lawton, 862.

Burdett, J. L.
Keto–enol tautomerism in β-dicarbonyls studied by nuclear magnetic resonance spectroscopy. II. Solvent effects on proton chemical shifts and on equilibrium constants. M. T. Rogers and J. L. Burdett, 1516.

Burnell, R. H.
Structural studies by mass spectrometry. Determination of the structure of lycofawcine (base L). W. A. Ayer, W. R. Bowman, P. Kebarle, and R. H. Burnell, 328.

Busfield, W. K.
Infrared spectra and structure of polyaldehydes. VI. Polyfluoral. W. K. Busfield and E. Whalley, 2289.

Byrne, J. P.
Diffuseness in electronic spectra. The vapor spectrum of anthracene. J. P. Byrne and I. G. Ross, 3253.

Cadena, D., Jr.
The electron spin resonance spectrum of $N^+(CH_3)_3$ in γ-irradiated betaine. R. Drews, D. Cadena, Jr., and J. Rowlands, 2439.

Calvert, L. D.
The arsenides of tungsten and molybdenum: WAs_2, W_2As_3, $MoAs_2$, Mo_2As_3, and Mo_4As_4. J. B. Taylor, L. D. Calvert, and M. R. Hunt, 3045.

Calvo, C.
The crystal structure of α-$Zn_3(PO_4)_2$. C. Calvo, 436.
Refinement of the crystal structure of β-$Mg_2P_2O_7$. C. Calvo, 1139.
The crystal structure and phase transitions of β-$Zn_2P_2O_7$. C. Calvo, 1147.

Campbell, A. N.
Heats of mixing and heat capacities in the system: acetic acid – chloroform – water, at 25°. A. N. Campbell and J. M. T. M. Gieskes, 1004.
Conductances and surface tensions of aqueous solutions of sodium decanoate, sodium laurate, and sodium myristate, at 25° and 35°. A. N. Campbell and G. R. Lakshminarayanan, 1729.

The system: bismuth–cadmium–mercury. A. N. Campbell and E. M. Kartzmark, 1924.
Campbell, P. G. C.
Cyclohexene-3,3,6,6-d_4. A useful compound for the study of mechanism and structure. S. Wolfe and P. G. C. Campbell, 1184.
Cant, N. W.
The infrared spectrum of ammonia adsorbed on Cabosil silica powder. N. W. Cant and L. H. Little, 1252.
Carlson, J. M.
Photochemical transformations of some 4′-amino-2-styrylpyridines and their salts. J. L. R. Williams, J. M. Carlson, R. E. Adel, and G. A. Reynolds, 1345.
Carty, A. J.
Nuclear magnetic resonance spectra and conductivities of some metal acetylacetonates. A. J. Carty, D. G. Tuck, and E. Bullock, 2559.
Casey, E. J.
On the formation of "Ag_2O_3" on silver electrodes. E. J. Casey and W. J. Moroz, 1199.
Casselman, A. A.
Paper chromatography of some amine hydrochlorides and acetates in acidic solvent systems. R. A. B. Bannard and A. A. Casselman, 395.
Cyclohexane compounds. V. The reaction of 1-methoxycyclohexene-2 with aqueous N-bromosuccinimide. The 1-methoxy-2-bromo-3-hydroxycyclohexanes. R. A. B. Bannard, A. A. Casselman, and L. R. Hawkins, 2398.
Cassidy, R. M.
Cadmium species in basic solution. D. E. Ryan, J. R. Dean, and R. M. Cassidy, 999.
Castelliz, L.
Determination of the crystal structure of erbium titanate, $Er_2Ti_2O_7$, by X-ray and neutron diffraction. O. Knop, F. Brisse, L. Castelliz, and Sutarno, 2812.
Cessna, A. J.
The action of Fenton's reagent on cyclopropylcarbinol. C. C. Lee, A. J. Cessna, and M. K. Frost, 2924.
Chadha, J. S.
3,5,8,4′-Tetramethoxyflavone and the constitution of pratoletin. J. S. Chadha, 306.
Chang, H.-H.
Chasmanine and its structure. O. Achmatowicz, Jr., Y. Tsuda, L. Marion, T. Okamoto, M. Natsume, H.-H. Chang, and K. Kajima, 825.
Chapman, R. A.
9,10-Dimethyl- and 9,10-diphenyl-9,10-dihydro-9,10-ethanoanthracene by Friedel–Crafts cyclialkylations of 1,4-diarylsubstituted-1,4-diols. L. R. C. Barclay and R. A. Chapman, 1754.
Cheetham, N. F.
Light absorption studies. Part XXI. The ultraviolet and infrared absorption of *o*-alkyl- and *o,o′*-dialkyl-substituted anisoles. A. Balasubramanian, J. C. Dearden, W. F. Forbes, and (in part) N. F. Cheetham, 2603.
Cheney, G. E.
The copper(II) *syn*-phenyl-2-pyridyl ketoxime system. Part I. T. L. Meek and G. E. Cheney, 64.
Chisholm, M. J.
Fatty acids of *Catalpa bignonioides* and other Bignoniaceae seed oils. M. J. Chisholm and C. Y. Hopkins, 2566.
Occurrence in seed oils of some fatty acids with conjugated unsaturation. C. Y. Hopkins and M. J. Chisholm, 3159.
Chiu, N. W. K.
Pyrazolines. V. Ring closure to oxygen in the pyrolysis of 3-acetyl-Δ^1-pyrazolines. D. E. McGreer, N. W. K. Chiu, and M. G. Vinje, 1398.
Pyrazolines. VI. The stereochemistry in the pyrolysis of pyrazolines for the C_3 and C_5 positions of the pyrazoline molecule. D. E. McGreer, N. W. K. Chiu, M. G. Vinje, and K. C. Wong, 1407.
Chow, D.
The ammonomercuration of cyclohexene. D. Chow, J. H. Robson, and G. F Wright, 312.
Chow, Y. L.
Photo-addition of *N*-nitrosodialkylamines to cyclohexene. Y. L. Chow, 2711.
Chrysochoos, J.
Surface effects in the uninhibited and the inhibited pyrolyses of isomeric hexanes. Part V. 2,2-Dimethyl butane (neohexane). J. Chrysochoos and W. A. Bryce, 2457.
Surface effects in the uninhibited and the inhibited pyrolyses of isomeric hexanes. Parts I–III. *n*-Hexane, 2-methyl pentane, 3-methyl pentane. J. Chrysochoos and W. A. Bryce, 2092.
Chu, B.
Light scattering of a critical binary liquid mixture: triethylamine–water. B. Chu and W. P. Kao, 1803.
Clugston, D. M.
Mass spectra of some furoquinoline alkaloids. D. M. Clugston and D. B. MacLean, 2516.
Coleman, I. W.
Preparation of antidotes for anticholinesterase poisoning. III. Esters of 1-arylcycloalkanecarboxylic acids. J. H. Parkkari, R. A. B. Bannard, and I. W. Coleman, 3119.
Colter, A. K.
Electronic effects in E2 reactions. II. *t*-Butoxide-induced eliminations of 2-methyl-3-pentyl arenesulfonates. A. K. Colter and D. R. McKelvey, 1282.
Substituent effects in the fluorene series. I. Synthesis and acetolysis of some dinitro-9-fluorenyl *p*-toluenesulfonates. F. F. Guzik and A. K. Colter, 1441.

Combes, A.
La pyrolyse du propane et de l'isopentane. Influence de traces d'oxygène et effets de parois. M. Niclause, R. Martin, A. Combes, and M. Dzierzynski, 1120.
Connor, M.
Thermal rearrangement of benzyldimethylamine oxide. G. P. Shulman, P. Ellgen, and M. Connor, 3459.
Conway, T.
Ortho-chlorobenzalmalonamide and related compounds. R. P. Mariella and T. Conway, 2426.
Cook, D.
α-Pyridone complexes and their infrared spectra. D. Cook, 741.
Protonated carbonyl groups. V. α-Pyridone salts. D. Cook, 749.
The structure of aminopyrine salts. D. Cook, 3322.
Cooper, F. P.
The water-soluble polysaccharides of dermatophytes. IV. Galactomannans I from *Trichophyton granulosum, Trichophyton interdigitale, Microsporum quinckeanum, Trichophyton rubrum,* and *Trichophyton schönleinii.* C. T. Bishop, M. B. Perry, F. Blank, and F. P. Cooper, 30.
Glycosidation of sugars. III. Gas–liquid chromatography of the methyl glycosides of D-galactose, D-glucose, and D-mannose as their trimethylsilyl ethers. V. Smirnyagin, C. T. Bishop, and F. P. Cooper, 3109.
Couchman, F. M.
Gas–liquid chromatography of terpenes. Part XIII. The volatile oil of the leaves of *Juniperus horizontalis* Moench. F. M. Couchman and E. von Rudloff, 1017.
Coutts, R. T.
Organic sulfur compounds. Part I. Benzothiazine hydroxamic acids and related compounds. R. T. Coutts, H. W. Peel, and E. M. Smith, 3221.
Crabbé, P.
Terpenoids. XIII. The stereochemistry of chaparrin, chaparrol, and related compounds. T. R. Hollands, P. de Mayo, M. Nisbet, and P. Crabbé, 3008.
Cranton, G. E.
Synthesis in aqueous solutions of binary compounds of the transition metals with group VA and VIA elements. G. E. Cranton and R. D. Heyding, 2027.
Crawford, R. J.
Ester hydrazones as possible precursors to alkoxydiazoalkanes. I. The synthesis of ester (*p*-tolylsulfonyl)hydrazones and their decomposition in protic solvents to give mixed acetals. R. J. Crawford and R. Raap, 126.
Ester hydrazones as possible precursors to alkoxydiazoalkanes. II. The decomposition of ester (*p*-tolylsulfonyl)hydrazone salts in aprotic solvents. R. J. Crawford and R. Raap, 356.
The conversion of meta- and para-substituted benzaldoxime arenesulfonates to nitriles. R. J. Crawford and C. Woo, 1534.
Ortho participation in the conversion of *syn*-benzaldoxime esters to nitriles. R. J. Crawford and C. Woo, 3178.
Csizmadia, I. G.
The stereochemistry of halogen displacement by nitrate ion: racemization and retention of configuration in the synthesis of dinitrate esters. L. D. Hayward, M. Jackson, and I. G. Csizmadia, 1656.
Cullen, W. R.
Vibrational spectra of some alkylarsonium compounds. W. R. Cullen, G. B. Deacon, and J. H. S. Green, 3193.
Addition of fluoroacetylenes to group V hydrides. W. R. Cullen, D. S. Dawson, and G. E. Styan, 3392.
Curtis, E. J. C.
Synthesis of 4-*O*-β-D-galactopyranosyl-D-galactose. E. J. C. Curtis and J. K. N. Jones, 2508.
Cyr, N.
A study of tautomerism in cyclic β-diketones by proton magnetic resonance. N. Cyr and L. W. Reeves, 3057.
Cyr, T. J. R.
A proton magnetic resonance study of sodium 3,5,5-trimethyl hexanoate. T. J. R. Cyr and B. A. Dunell, 1237.
Dacey, J. R.
Photolysis of hexafluoroazomethane near room temperature. J. R. Dacey, R. F. Mann, and G. O. Pritchard, 3215.
Daggett, H. M., Jr.
The electrical conductivities of some tetra-*n*-alkylammonium salts in acetonitrile. A. C. Harkness and H. M. Daggett, Jr., 1215.
Dahl, G. H.
Preparation and properties of diethyl(diphenylphosphinyl)aluminium. A. W. Johnson, W. D. Larson, and G. H. Dahl, 1338.
Dannley, R. L.
The synthesis of 2-aminobenzenethiol hydrochlorides. R. L. Dannley and D. A. Zazaris, 2610.
The condensation of phosphonothioic and phosphonic dichlorides with *o*-diamines. R. L. Dannley and A. Grava, 3377.
Danon, J.
Radiation-induced changes in the unsaturation of polyisoprene. M. A. Golub and J. Danon, 2772.
Danyluk, S. S.
Hindered internal rotation in boron halide complexes of N,N-dimethylformamide. E. S. Gore, D. J. Blears, and S. S. Danyluk, 2135.

Darwish, D.
The solvolysis of arenesulfinates, sulfur–oxygen versus carbon–oxygen bond fission. D. Darwish and J. Noreyko, 1366.
Davidson, T. A.
Terpenoids. XII. The structure of chaparrin. T. A. Davidson, T. R. Hollands, P. de Mayo, and M. Nisbet, 2996.
Davies, D. H.
Some heats of solution in light and heavy water. D. H. Davies and G. C. Benson, 3100.
Dawson, D. S.
Addition of fluoroacetylenes to group V hydrides. W. R. Cullen, D. S. Dawson, and G. E. Styan, 3392.
Deacon, G. B.
Vibrational spectra of some alkylarsonium compounds. W. R. Cullen, G. B. Deacon, and J. H. S. Green, 3193.
Dean, F. H.
Aliphatic vicinal fluorobromides: some preparations and reactions. F. L. M. Pattison, D. A. V. Peters, and F. H. Dean, 1689.
The synthesis of α-monofluoroalkanoic acids. F. L. M. Pattison, R. L. Buchanan, and F. H. Dean, 1700.
Synthesis of the isomeric methyl *vic*-bromofluoropropanoates. F. H. Dean and F. L. M. Pattison, 2415.
Dean, J. R.
Cadmium species in basic solution. D. E. Ryan, J. R. Dean, and R. M. Cassidy, 999.
Dearden, J. C.
Light absorption studies. Part XXI. The ultraviolet and infrared absorption of *o*-alkyl- and *o,o'*-dialkyl-substituted anisoles. A. Balasubramanian, J. C. Dearden, W. F. Forbes, and (in part) N. F. Cheetham, 2603.
Deckers, J. M.
Supersonic molecular beams. II. Theory of the formation of supersonic molecular beams. J. P. Valleau and J. M. Deckers, 6.
Delgado, J. G.
A chemical study of *Bocconia latisepala* Wats. X. A. Dominguez, J. G. Delgado, A. Monroy C., L. G. Armendariz, A. Alcala, J. Quevedo, and P. Rojas, 679.
Demarco, P. V.
The stereochemistry of the tetrahydropimaric acids. J. W. ApSimon, P. V. Demarco, and J. Lemke, 2793.
De Maré, G. R.
The Hg $6(^3P_1)$ photosensitized decomposition of cyclohexene vapor. G. R. De Maré, O. P. Strausz, and H. E. Gunning, 1329.
de Mayo, P.
Terpenoids. VIII. The immediate precursors of helminthosporal and helminthosporol. P. de Mayo, R. E. Williams, and E. Y. Spencer, 1357.
Terpenoids. X. Pre-senegenin, a quite normal triterpenoid. J. J. Dugan and P. de Mayo, 2033.
Terpenoids. XII. The structure of chaparrin. T. A. Davidson, T. R. Hollands, P. de Mayo, and M. Nisbet, 2996.
Terpenoids. XIII. The stereochemistry of chaparrin, chaparrol, and related compounds. T. R. Hollands, P. de Mayo, M. Nisbet, and P. Crabbé, 3008.
Dennis, N. J.
The oxidation of sugar acetals and thioacetals by *Acetobacter suboxydans*. D. T. Williams, J. K. N. Jones, N. J. Dennis, R. J. Ferrier, and W. G. Overend, 955.
Desnoyers, J.
Coordination complexes of niobium pentachloride with triphenyl derivatives of group V elements. J. Desnoyers and R. Rivest, 1879.
Desnoyers, J. E.
Salting-in by quaternary ammonium salts. J. E. Desnoyers, G. E. Pelletier, and C. Jolicoeur, 3232.
de Sorgo, M.
The photolysis of carbon disulfide and carbon disulfide – oxygen mixtures. M. de Sorgo, A. J. Yarwood, O. P. Strausz, and H. E. Gunning, 1886.
Dhami, K. S.
^{13}C n.m.r. studies. Part III. Carbon-13 n.m.r. spectra of substituted acetophenones. K. S. Dhami and J. B. Stothers, 479.
^{13}C n.m.r. studies. Part IV. Carbon-13 n.m.r. spectra of some alkyl phenyl ketones. K. S. Dhami and J. B. Stothers, 498.
^{13}C n.m.r. studies. Part V. Carbon-13 spectra of some substituted styrenes. K. S. Dhami and J. B. Stothers, 510.
Diaper, D. G. M.
Reactions of ozonides. III. Ozonolysis of ethyl 10-undecenoate in ethanol. D. G. M. Diaper and D. L. Mitchell, 319.
Dick, A. J.
Synthesis of 4-acetamido-4-deoxy-sugars. A. J. Dick and J. K. N. Jones, 977.
Diederich, J. F. G.
Synthesis of some alpha-substituted cystines. R. J. Thibert, J. F. G. Diederich, and K. G. Rutherford, 206.
Diehl, P.
A simplified procedure for the analysis of complex nuclear magnetic resonance spectra. I. The principles of sub-spectral analysis. P. Diehl, R. G. Jones, and H. J. Bernstein, 81.
Addendum: A simplified procedure for the analysis of complex nuclear magnetic resonance spectra. I. The principles of sub-spectral analysis. P. Diehl, R. G. Jones, and H. J. Bernstein, 1891.

DiGiorgio, J. B.
Some anomalous carbonyl stretching frequencies in steroid infrared spectra. R. N. Jones and J. B. DiGiorgio, 182.
Dignam, M. J.
Determination of the field dependence of the Tafel slope for the steady-state anodic oxidation of aluminium. M. J. Dignam, D. Goad, and M. Sole, 800.
Diller, D.
Acylguanidines as intermediates in peptide syntheses. E. Hoffman and D. Diller, 3103.
Dionne, O.
Cation exchange in anhydrous ethylenediamine. W. R. Heumann, O. Dionne, and G. Tremblay, 1096.
Divekar, P. V.
Studies in the biochemistry of microorganisms. Part 117. Sepedonin, a tropolone metabolite of *Sepedonium chrysospermum* Fries. P. V. Divekar, H. Raistrick, T. A. Dobson, and L. C. Vining, 1835.
Dobson, T. A.
Studies in the biochemistry of microorganisms. Part 117. Sepedonin, a tropolone metabolite of *Sepedonium chrysospermum* Fries. P. V. Divekar, H. Raistrick, T. A. Dobson, and L. C. Vining, 1835.
Dominguez, X. A.
A chemical study of *Bocconia latisepala* Wats. X. A. Dominguez, J. G. Delgado, A. Monroy C., L. G. Armendariz, A. Alcala, J. Quevedo, and P. Rojas, 679.
Doss, S. H.
Studies in the cyclization of the products of Stobbe condensation with propiophenone. A. M. El-Abbady and S. H. Doss, 2408.
Drews, R.
The electron spin resonance spectrum of $N^+(CH_3)_3$ in γ-irradiated betaine. R. Drews, D. Cadena, Jr., and J. Rowlands, 2439.
Dugan, J. J.
Terpenoids. X. Pre-senegenin, a quite normal triterpenoid. J. J. Dugan and P. de Mayo, 2033.
Dunell, B. A.
A proton magnetic resonance study of sodium 3,5,5-trimethyl hexanoate. T. J. R. Cyr and B. A. Dunell, 1237.
Dunn, G. E.
Application of the extended Hammett relationship to the ionization constants of substituted anthranilic acids. P. Leggate and G. E. Dunn, 1158.
Effect of changing pH upon the rate and mechanism of decarboxylation of substituted anthranilic acids. G. E. Dunn, P. Leggate, and I. E. Scheffler, 3080.
Dupuis, G.
Synthèses de peptides contenant des thioacides. C. Berse and G. Dupuis, 2174.
Dutton, G. G. S.
The structure of a synthetic arabinan. G. G. S. Dutton and A. M. Unrau, 924.
Analysis of products from periodate oxidation and from methylation of a rhamnan. G. G. S. Dutton and A. M. Unrau, 1738.
Dvornik, D.
Stereospecific synthesis of a dibenzo[*a,g*]quinolizine analog of 18-hydroxyalloyohimbane. B. Belleau and D. Dvornik, 2545.
Dyne, P. J.
Charge transfer and electron capture in the radiolysis of aliphatic hydrocarbons. P. J. Dyne, 1080.
Photochemistry of electrons trapped in glasses of methyltetrahydrofuran at 77 °K. P. J. Dyne and O. A. Miller, 2696.
Dzierzynski, M.
La pyrolyse du propane et de l'isopentane. Influence de traces d'oxygène et effets de parois. M. Niclause, R. Martin, A. Combes, and M. Dzierzynski, 1120.
Eager, R. L.
Radiation chemistry of alkali thiosulfates. R. L. Eager and D. S. Mahadevappa, 614.
Eager, R. L.
Mean lifetime of free radical chains in ^{60}Co γ-irradiated chloral hydrate and bromal hydrate solutions. R. G. McIntosh, R. L. Eager, and J. W. T. Spinks, 3490.
Eastham, A. M.
Erratum: New nitrochalcones. VII. T. Szell, A. M. Eastham, and G. Sipos, 2134.
Easton, N. R.
Synthesis of 2,2-disubstituted-5-cyanocyclopentanones. S. S. Kulp, V. B. Fish, and N. R. Easton, 2512.
Edgar, J. F.
Reactions of ethyldiazoacetate with cyclopentadiene. Synthesis of the epimeric ethyl bicyclo[3.1.0]hex-2-ene-6-carboxylates. J. Warkentin, E. Singleton, and J. F. Edgar, 3456.
Edward, J. T.
Ultraviolet study of the ionization of bisulfate ion. J. T. Edward and I. C. Wang, 2867.
Edwards, O. E.
Isopimaric acid. W. Antkowiak, O. E. Edwards, R. Howe, and J. W. ApSimon, 1257.
Reaction of dihydropyran with ethyl azidoformate. I. Brown and O. E. Edwards, 1266.
El-Abbady, A. M.
Studies on Stobbe condensation. Reactions of aldehydes and ketones with dimethyl methylsuccinate. A. M. El-Abbady and H. H. Mousa, 928.
Studies in the cyclization of the products of Stobbe condensation with propiophenone. A. M. El-Abbady and S. H. Doss, 2408.

Ellgen, P.
Thermal rearrangement of benzyldimethylamine oxide. G. P. Shulman, P. Ellgen, and M. Connor, 3459.
Elofson, R. M.
The electron-spin resonance spectra of some methylated anthrasemiquinones. Evidence for restricted rotation. R. M. Elofson, K. F. Schulz, B. E. Galbraith, and R. Newton, 1553.
Enterman, W.
The acid hydrolysis of glycosides. II. Effect of substituents at C-5. T. E. Timell, W. Enterman, F. Spencer, and E. J. Soltes, 2296.
Eusuf, M.
Kinetics and mechanisms of the thermal decomposition of propionaldehyde. Part I. The uninhibited reaction. K. J. Laidler and M. Eusuf, 268.
Kinetics and mechanisms of the thermal decomposition of propionaldehyde. Part II. The reaction in the presence of nitric oxide. K. J. Laidler and M. Eusuf, 278.
Falk, M.
Hydration of purines, pyrimidines, nucleosides, and nucleotides. M. Falk, 314.
The ultraviolet spectra of ribonucleic acids in solid state and in solution. M. Falk, 3151.
Farnum, D. G.
Nucleophilic addition of triethylamine to dimethyl acetylenedicarboxylate. R. J. Alaimo and D. G. Farnum, 700.
Fasman, G. D.
Conformational studies on synthetic poly-α-amino acids: the helical sense of poly-L-tryptophan: optical rotatory dispersion studies. G. D. Fasman, M. Landsberg, and M. Buchwald, 1588.
Fathy, I.
Carbonyl and thiocarbonyl compounds. IX. Synthesis of benzoxanthene ethers by the action of tetrahalo-*o*-benzoquinones. N. Latif and I. Fathy, 1246.
Ferrier, R. J.
The oxidation of sugar acetals and thioacetals by *Acetobacter suboxydans*. D. T. Williams, J. K. N. Jones, N. J. Dennis, R. J. Ferrier, and W. G. Overend, 955.
Fersht, E.
The reaction of active nitrogen with mixtures of ethylene and nitric oxide. E. Fersht and R. A. Back, 1899.
Fetter, N. R.
The structure of bis-dimethylaminoberyllium. N. R. Fetter and F. M. Peters, 1884.
Fieser, L. F.
Isobenzofurane, a transient intermediate. L. F. Fieser and M. J. Haddadin, 1599.
Figgis, B. N.
Oxygen-17 nuclear magnetic resonance study of the chromate reaction with dichromate. B. N. Figgis, R. G. Kidd, and R. S. Nyholm, 145.
Fischer, P. H. H.
The electron spin resonance spectra of dinitronaphthalene anion radicals. P. H. H. Fischer and C. A. McDowell, 3400.
Fish, V. B.
Synthesis of 2,2-disubstituted-5-cyanocyclopentanones. S. S. Kulp, V. B. Fish, and N. R. Easton, 2512.
Fisher, M. H.
Synthesis of isotopically labelled olefins via the Wittig reaction. J. G. Atkinson, M. H. Fisher, D. Horley, A. T. Morse, R. S. Stuart, and E. Synnes, 1614.
Flanagan, T. B.
Effects of the electronic band shape of palladium metal on the proton model for hydrogen absorption. J. W. Simons and T. B. Flanagan, 1665.
Flengas, S. N.
The preparation of anhydrous zirconium dichloride. B. Swaroop and S. N. Flengas, 2115.
On a platinum–rhodium – oxygen electrode in silicate melts. R. E. Ranford and S. N. Flengas, 2879.
On the relationship between equilibrium pressures and the phase diagram of a reactive system. The systems: $NaCl–Na_2ZrCl_6$, $KCl–K_2ZrCl_6$, $NaCl–KCl–ZrCl_4$. R. L. Lister and S. N. Flengas, 2947.
Flood, E. A.
The flow of gases through microporous carbon. R. F. Bartholomew and E. A. Flood, 1968.
Fonzes, L.
The structure of retamine and the partial synthesis of the (−)-enantiomorph. K. H. Shin, L. Fonzes, and L. Marion, 2012.
Forbes, W. F.
Light absorption studies. Part XXI. The ultraviolet and infrared absorption of *o*-alkyl- and *o,o'*-dialkyl-substituted anisoles. A. Balasubramanian, J. C. Dearden, W. F. Forbes, and (in part) N. F. Cheetham, 2603.
Forman, A. G.
Rearrangement studies with ^{14}C. XXIV. Solvolyses of 2-(α-naphthyl)-1-^{14}C-ethyl *p*-toluenesulfonate. C. C. Lee and A. G. Forman, 3387.
Forst, W.
The unimolecular decomposition of methyl chloride. W. Forst and P. St. Laurent, 3052.
Fraenkel, G.
Fast rearrangement of *exo*-norbornanol in strong acid solutions. G. Fraenkel, P. D. Ralph, and J. P. Kim, 674.
Fraser, G. H.
Considerations of adsorbed ionic intermediates on the AgO/Ag_2O electrode in aqueous alkaline solution. R. G. Barradas and G. H. Fraser, 446.

Fraser, R. R.
Configuration and conformation of 2,3-dichloro-1,4-dioxane, m.p. 52°. R. R. Fraser and C. Reyes-Zamora, 3445.
Fraser-Reid, B.
The mechanisms of the halogenations and halogenomethoxylations of D-glucal triacetate, D-galactal triacetate, and 3,4-dihydropyran. R. U. Lemieux and B. Fraser-Reid, 1460.

Cation exchange in anhydrous ethylenediamine. W. R. Heumann, O. Dionne, and G. Tremblay, 1096.
Deshydratation des échangeurs de cations. W. R. Heumann and F. D. Rochon, 3483.
Heyding, R. D.
Synthesis in aqueous solutions of binary compounds of the transition metals with group VA and VIA elements. G. E. Cranton and R. D. Heyding, 2027.
Hikida, T.
Photochemical synthesis of vinylthiols. O. P. Strausz, T. Hikida, and H. E. Gunning, 717.
Hill, D. L.
Electrochemical studies on titanium in molten LiCl–KCl eutectic. R. Baboian, D. L. Hill, and R. A. Bailey, 197.
Hill, E. A.
Mechanism of action of UDPGal-4-epimerase: isotope effect studies. R. D. Bevill III, E. A. Hill, F. Smith, and S. Kirkwood, 1577.
Hill, R. A.
A proton magnetic resonance study of N-bis(2-haloethyl)amines. G. R. Pettit, J. A. Settepani, and R. A. Hill, 1792.
Hill, R. D.
Biosynthesis of colchicine. Tracer studies with cinnamate-3-^{14}C, methanol-^{14}C, and ornithine-2-^{14}C. R. D. Hill and A. M. Unrau, 709.
Hirsch, A.
Quantitative preparation of chloro- and bromophthalazines. A. Hirsch and D. Orphanos, 2708.
Hirst, R. C.
A simplified procedure for the anlysis of complex nuclear magnetic resonance spectra. II. The analysis of symmetrical trifluorobenzene, the AA'A''XX'X'' system. R. G. Jones, R. C. Hirst, and H. J. Bernstein, 683.
Ho, S. C.
Studies in the pyrroline series. V. 3,3-Dimethyl-1-pyrroline-1-oxide. R. Bonnett, S. C. Ho, and J. A. Raleigh, 2717.
Hoffman, E.
Acylguanidines as intermediates in peptide syntheses. E. Hoffman and D. Diller, 3103.
Hoge, R.
X-ray study of liquid $AsBr_3$. R. Hoge and J. Trotter, 2692.
Hollands, T. R.
Terpenoids. XII. The structure of chaparrin. T. A. Davidson, T. R. Hollands, P. de Mayo, and M. Nisbet, 2996.
Terpenoids. XIII. The stereochemistry of chaparrin, chaparrol, and related compounds. T. R. Hollands, P. de Mayo, M. Nisbet, and P. Crabbé, 3008.
Hollingshead, L. W.
Sample injection in programmed temperature gas chromatography and its significance for trace analysis. L. W. Hollingshead, H. W. Habgood, and W. E. Harris, 1560.
Holmes, H. L.
Solvent effects in the nuclear magnetic resonance spectra of benzalmalononitriles. M. A. Weinberger, R. M. Heggie, and H. L. Holmes, 2585.
Holt, A. S.
Structures of *Chlorobium* chlorophylls (650). J. W. Purdie and A. S. Holt, 3347.
Hooper, D. L.
The magnetic anistropy of the carbonyl bond. D. L. Hooper and R. Kaiser, 2363.
Hopkins, C. Y.
Fatty acids of *Catalpa bignonioides* and other Bignoniaceae seed oils. M. J. Chisholm and C. Y. Hopkins, 2566.
Occurrence in seed oils of some fatty acids with conjugated unsaturation. C. Y. Hopkins and M. J. Chisholm, 3159.
Horitsu, K.
An exocellular mannan, alternately linked 1,3-β and 1,4-β from *Rhodotorula glutinis*. P. A. J. Gorin, K. Horitsu, and J. F. T. Spencer, 950.
Formation of *O*-β-D-glucopyranosyl- and *O*-β-D-galactopyranosyl-myo-inositols by glycosyl transfer. P. A. J. Gorin, K. Horitsu, and J. F. T. Spencer, 2259.
Horley, D.
Synthesis of isotopically labelled olefins via the Wittig reaction. J. G. Atkinson, M. H. Fisher, D. Horley, A. T. Morse, R. S. Stuart, and E. Synnes, 1614.

The infrared spectra of some titanium(IV) complexes with primary diamines. D. Horley and E. G. Torrible, 3201.

Howard, J. A.
The kinetics of the inhibited autoxidation of tetralin. II. J. A. Howard and K. U. Ingold, 2724.
Absolute rate constants for hydrocarbon autoxidation. I. Styrene. J. A. Howard and K. U. Ingold, 2729.
Absolute rate constants for hydrocarbon autoxidation. II. Deutero styrenes and ring-substituted styrenes. J. A. Howard and K. U. Ingold, 2737.

Howe, R.
Isopimaric acid. W. Antkowiak, O. E. Edwards, R. Howe, and J. W. ApSimon, 1257.

Hruska, F.
Correlations of proton coupling constants in the cyclopropane ring with electronegativity. Consideration of the proton resonance spectrum of cyclopropyllithium. T. Schaefer, F. Hruska, and G. Kotowycz, 75.
The relative signs of the proton coupling constants in diketene and vinyl formate. F. Hruska, H. M. Hutton, and T. Schaefer, 1942.
Concerning the ortho shift in proton and fluorine magnetic resonance of some conjugated hydrocarbons. F. Hruska, H. M. Hutton, and T. Schaefer, 2392.
Correlation of ethylenic proton coupling constants with the electronegativity of substituents. Interpretation of the deviations of bromo and iodo substituents. F. Hruska, G. Kotowycz, and T. Schaefer, 2827.
A linear correlation of proton chemical shifts in some alkyl chlorides and hydrocarbons with the occupation number of the hydrogen orbitals. F. Hruska, G. Kotowycz, and T. Schaefer, 3188.

Hulyalkar, R. K.
The chemistry of D-apiose. Part II. The configuration of D-apiose in apiin. R. K. Hulyalkar, J. K. N. Jones, and M. B. Perry, 2085.
The preparation of L-lyxuronic acid, L-lyxose, and 5-deoxy-L-lyxose. R. K. Hulyalkar and M. B. Perry, 3241.

Humphreys, W. G.
A l.e.t. independent dosimeter based on the chemiluminescent determination of H_2O_2. W. A. Armstrong and W. G. Humphreys, 2576.

Hunt, M. R.
The arsenides of tungsten and molybdenum: WAs_2, W_2As_3, $MoAs_2$, Mo_2As_3, and Mo_5As_4. J. B. Taylor, L. D. Calvert, and M. R. Hunt, 3045.

Hurst, D. T.
The alcoholysis of trialkylalkoxysilanes. Part II. The preparation and chemistry of methyl 2,3,4-tri-*O*-trimethylsilyl-α-D-glucopyranoside. D. T. Hurst and A. G. McInnes, 2004.

Hutton, H. M.
The relative signs of the proton coupling constants in diketene and vinyl formate. F. Hruska, H. M. Hutton, and T. Schaefer, 1942.
Concerning the ortho shift in proton and fluorine magnetic resonance of some conjugated hydrocarbons. F. Hruska, H. M. Hutton, and T. Schaefer, 2392.
The amino proton shifts of some substituted anilines in cyclohexane. T. Yonemoto, W. F. Reynolds, H. M. Hutton, and T. Schaefer, 2668.
Solvent dependence of chemical shift and coupling constants in *p*-nitroanisole. H. M. Hutton and T. Schaefer, 3116.

Hutzinger, O.
The synthesis of potentially physiologically active β-phenylethylamines. Part III. Some β-alkoxy-β-(3,4-dihydroxyphenyl)ethylamines. R. A. Heacock, O. Hutzinger, and B. D. Scott, 2437.
The chemistry of the aminochromes. Part VIII. The preparation and properties of 4- and 7-methyladrenochrome. R. A. Heacock and O. Hutzinger, 2535.

Hyne, J. B.
Sulfonium salt solvolysis. Part V. Model systems for biological transmethylation. J. B. Hyne and J. H. Jensen, 57.
Some base-catalyzed condensations of systems of the form $R_1R_2C{=}C(CN)_2$. M. R. S. Weir and J. B. Hyne, 772.

Ing, S. Y.-S.
The reaction of some aromatic acids with sodium azide in a trifluoroacetic acid – trifluoroacetic anhydride medium. K. G. Rutherford, S. Y.-S. Ing, and R. J. Thibert, 541.

Ingold, K. U.
The kinetics of the inhibited autoxidation of tetralin. II. J. A. Howard and K. U. Ingold, 2724.
Absolute rate constants for hydrocarbon autoxidation. I. Styrene. J. A. Howard and K. U. Ingold, 2729.
Absolute rate constants for hydrocarbon autoxidation. II. Deutero styrenes and ring-substituted styrenes. J. A. Howard and K. U. Ingold, 2737.

Inoue, H.
Infrared emission spectra of fatty acids on steel surfaces. M. J. D. Low and H. Inoue, 2047.

Iqbal, M.
Quinoxaline derivatives. VIII. The effect of electron-donating groups on the formation of certain quinoxalinecarboxyanilide *N*-oxides and their rearrangement. Y. Ahmad, M. S. Habib, M. Iqbal, M. I. Qureshi, and Ziauddin, 3424.

Jacko, M. G.
The pyrolysis of trimethylthallium. M. G. Jacko and S. J. W. Price, 1961.
The heat of sublimation and heat of vaporization of trimethylthallium. S. J. Price and M. G. Jacko, 3481.

Jackson, K. G. A.
The *C*- and *O*-benzylation of L-ascorbic acid. K. G. A. Jackson and J. K. N. Jones, 450.

Jackson, M.
The stereochemistry of halogen displacement by nitrate ion: racemization and retention of configuration in the synthesis of dinitrate esters. L. D. Hayward, M. Jackson, and I. G. Csizmadia, 1656.
Jain, S. C.
Coordination complexes of group (IV) halides. Preparation of the complexes of titanium tetrachloride, titanium tetrabromide, and tin tetrachloride with some thio-, isothio-, and iso-cyanate ligands. S. C. Jain and R. Rivest, 787.
James, D. G. L.
Reactions of the ethyl radical. IV. Addition to vinyl monomers. D. G. L. James and D. MacCallum, 633.
Reactions of the ethyl radical. V. Addition to the monomethyl acrylonitriles. D. G. L. James and T. Ogawa, 640.
The reactivity of the cyclic polyenes towards free radicals. II. Metathesis with the ethyl radical. A. C. R. Brown and D. G. L. James, 660.
Reactions of the ethyl radical. VI. Addition to conjugated dienes. A. C. R. Brown and D. G. L. James, 1102.
The reactivity of the cyclic polyenes towards free radicals. III. Addition of the ethyl radical. A. C. R. Brown and D. G. L. James, 1110.
Jamieson, J. W. S.
The reactions of 2-methyl ethylenimine and azacyclobutane with atomic hydrogen. J. W. S. Jamieson, G. R. Brown, and W. K. Hancock, 1975.
Possible calorimetric method for measurement of the ligand field splitting energies for the hexaaquo cations of some transition elements. J. W. S. Jamieson, G. R. Brown, D. W. Gruener, R. V. Peiluck, and R. A. LaMontagne, 2148.
High energy modifications of the hydrates of zinc sulfate. J. W. S. Jamieson, R. A. LaMontagne, B. A. Pattern, and G. R. Brown, 3129.
Janzen, A. F.
The reaction of hexafluoroacetone with some silanes. A. F. Janzen and C. J. Willis, 3063.
Jardine, R. V.
The preparation of 3-alkylthioindoles. R. V. Jardine and R. K. Brown, 1293.
Anomalous reactions in attempts to prepare 3-alkylthioindoles. R. V. Jardine and R. K. Brown, 1298.
Jennings, H. J.
Reactions of sugar chlorosulfates. Part V. The synthesis of chlorodeoxy sugars. H. J. Jennings and J. K. N. Jones, 2372.
Reactions of sugar chlorosulfates. Part VI. The structure of unsaturated chlorodeoxy sugars. H. J. Jennings and J. K. N. Jones, 3018.
Jensen, J. H.
Sulfonium salt solvolysis. Part V. Model systems for biological transmethylation. J. B. Hyne and J. H. Jensen, 57.

Mass spectra of some furoquinoline alkaloids. D. M. Clugston and D. B. MacLean, 2516.
Demjanov rearrangement of 9-xanthenemethylamine. S. N. Alam and D. B. MacLean, 3433.

MacLean, H.
Lignin model compounds. III. Detection of 1-hydroxy-1-(4-hydroxy-3-methoxyphenyl)-2-propanone in the acidolysis products of lignin. J. A. F. Gardner and H. MacLean, 2421.

MacLean, J. W.
Secondary kinetic isotope effects in bimolecular nucleophilic substitutions. II. α-Deuterium effects in Menschutkin reactions of methyl iodide. K. T. Leffek and J. W. MacLean, 40.

McLean, S.
An electron impact study of some C_8H_{16} isomers. F. Meyer, P. Haynes, S. McLean, and A. G. Harrison, 211.

McLeod, D. H.
Thermal indolization of arylhydrazones. A. H. Kelly, D. H. McLeod, and J. Parrick, 296.

McLeod, P.
Tellurate complexes of nickel, palladium, and platinum, and a periodate compound of nickel. M. W. Lister and P. McLeod, 1720.

McLeskey III, J. J.
The n.m.r. spectrum of 2,3,5-trimethyl-2,3,5-tricyanohexane. Unusual temperature dependence of magnetic nonequivalence. P. Smith and J. J. McLeskey III, 2418.

McMaster, C. H.
Simultaneous polarographic determination of small amounts of bismuth and lead in copper-base alloys. C. H. McMaster, 405.
McMaster, J. B.
The dihydroxystrychnines. D. M. S. Wheeler, M. C. Smith, A. M. Kneece, and J. B. McMaster, 985.
McNesby, J. R.
Deuterium isotope effect in vacuum-ultraviolet absorption coefficients of water and methane. A. H. Laufer and J. R. McNesby, 3487.
Mackie, W.
Nuclear magnetic resonance spectral observations on the glycol-scission of deuterated D-glucose. W. Mackie and A. S. Perlin, 2645.
1,2-*O*-Isopropylidene-α-D-glucofuranose-5-*d* and -5,6,6′-d_3. W. Mackie and A. S. Perlin, 2921.
Magee, J. S.
Studies of sodium cuprate(III) stability. J. S. Magee, Jr. and R. H. Wood, 1234.
Mahadevappa, D. S.
Radiation chemistry of alkali thiosulfates. R. L. Eager and D. S. Mahadevappa, 614.
Maitlis, P. M.
Reactions of palladium compounds with acetylenes. II. Tetrakis(*p*-chlorophenyl)cyclobutadiene palladium complexes. P. M. Maitlis, D. Pollock, M. L. Games, and W. J. Pryde, 470.
Mann, R. F.
Photolysis of hexafluoroazomethane near room temperature. J. R. Dacey, R. F. Mann, and G. O. Pritchard, 3215.
Manning, P. G.
Chloride and sulfate ion association with some lanthanide and actinide ions. P. G. Manning, 2911.
The ratios of stepwise stability constants. III. The rare-earth α-hydroxymonocarboxylates. P. G. Manning, 3258.
Rare-earth acetate ion association. P. G. Manning, 3476.
Manske, R. H. F.
The alkaloids of fumariaceous plants. LII. A new alkaloid, cularicine, and its structure. R. H. F. Manske, 989.
The alkaloids of papaveraceous plants. LIII. *Eschscholtzia californica* Cham. R. H. F. Manske and K. H. Shin, 2180.
The alkaloids of papaveraceous plants. LIV. The structure of eschscholtzine. R. H. F. Manske, K. H. Shin, A. R. Battersby, and D. F. Shaw, 2183.
Mariella, R. P.
Ortho-chlorobenzalmalonamide and related compounds. R. P. Mariella and T. Conway, 2426.
Marion, L.
Chasmanine and its structure. O. Achmatowicz, Jr., Y. Tsuda, L. Marion, T. Okamoto, M. Natsume, H.-H. Chang, and K. Kajima, 825.
The structure of homochasmanine. O. Achmatowicz, Jr. and L. Marion, 1093.
The structure of retamine and the partial synthesis of the (−)-enantiomorph. K. H. Shin, L. Fonzes, and L. Marion, 2012.
The oxidation of diterpenoid alkaloids. O. Achmatowicz, Jr., Y. Tsuda, and L. Marion, 2336.
Markovac, A.
Higher homologues from pyrroles and dipyrrylmethenes. S. F. MacDonald and A. Markovac, 3247.
Syntheses with 5-dibromomethyl- and 5-formyl-pyrromethenes. A. Markovac and S. F. MacDonald, 3364.
Marr, D. H.
^{13}C n.m.r. studies. Part VI. Carbon-13 spectra of αβ-unsaturated carbonyl compounds. D. H. Marr and J. B. Stothers, 596.
Marsden, D. A.
Mass distribution in thermal neutron fission of ^{239}Pu. D. A. Marsden and L. Yaffe, 249.
Marsh, W. C.
Stereochemistry of the reduction of cyclic ketones with the pyridine-*n*-butyllithium adduct: steric approach and product development controls. R. A. Abramovitch, W. C. Marsh, and J. G. Saha, 2631.
Martin, J. G.
The Orton rearrangement in aprotic solvents. Part II. The acid-catalyzed bromination of anisole by a series of 4-substituted N-bromoacylanilides. J. M. W. Scott and J. G. Martin, 732.
Martin, R. R.
Evidence for $ZnF_2.2H_20$. Dehydration and X-ray diffraction studies. E. A. Secco and R. R. Martin, 175.
Martin, R.
La pyrolyse du propane et de l'isopentane. Influence de traces d'oxygène et effets de parois. M. Niclause, R. Martin, A. Combes, and M. Dzierzynski, 1120.
Mattock, G. L.
The chemistry of the aminochromes. Part VI. The reaction of adrenochrome with glutathione. G. L. Mattock and R. A. Heacock, 119.
Matsushima, T.
Application of differential thermal analysis to the dissociation of MnO_2 and Mn_2O_3. T. Matsushima and W. J. Thoburn, 1723.
Mazurek, M.
Synthesis of β-D-mannose 1,2-orthoacetates. M. Mazurek and A. S. Perlin, 1918.
Meakin, D.
Glucoputranjivin. M. H. Benn and D. Meakin, 1874.

Meek, T. L.
The copper(II) *syn*-phenyl-2-pyridyl ketoxime system. Part I. T. L. Meek and G. E. Cheney, 64.
Melby, L. R.
Substituted quinodimethans. VIII. Salts derived from the 7,7,8,8-tetracyanoquinodimethan anion–radical and benzologues of quaternary pyrazinium. L. R. Melby, 1448.
Mendelson, W. L.
Reactivity and geometry in allylic systems. III. Photosensitized oxygenation of cholest-4-ene, a steroid olefin with a conformationally flexible ring. A. Nickon and W. L. Mendelson, 1419.
Mettee, H. D.
Spectroscopic studies of alcohols. V. Intramolecular hydrogen bonds in 2-cyanoethanol and in some nitroalcohols. P. J. Krueger and H. D. Mettee, 2888.
Spectroscopic studies of alcohols. VI. Intramolecular hydrogen bonds in ethanolamine and its *O*- and *N*-methyl derivatives. P. J. Krueger and H. D. Mettee, 2970.
Meyer, F.
A pulsed ion source for the study of unimolecular and bimolecular reactions of gas-phase ions. T. W. Shannon, F. Meyer, and A. G. Harrison, 159.
An electron impact study of some C_5H_{10} isomers. F. Meyer, P. Haynes, S. McLean, and A. G. Harrison, 211.
Miller, J. M.
The heat of formation of boron tribromide – acetonitrile. J. M. Miller and M. Onyszchuk, 1877.
Miller, O. A.
Photochemistry of electrons trapped in glasses of methyltetrahydrofuran at 77 °K. P. J. Dyne and O. A. Miller, 2696.
Millington, J. P.
Solvolysis of alkyl chlorosulfates. Part I. Reaction of *n*-propyl chlorosulfate with nucleophiles. E. Buncel and J. P. Millington, 547.
Hydrolysis of a series of primary alkyl chlorosulfates: entropy of activation as a criterion of fragmentation in solvolytic reactions. E. Buncel and J. P. Millington, 556.
Mingins, J.
The diffuse layer correction to the discrete-ion effect in electric double layer theory. S. Levine, J. Mingins, and G. M. Bell, 2834.
Mirhej, M. E.
Proton spin relaxation by paramagnetic molecular oxygen. M. E. Mirhej, 1130.
Mitchell, D. L.
Reactions of ozonides. III. Ozonolysis of ethyl 10-undecenoate in ethanol. D. G. M. Diaper and D. L. Mitchell, 319.
Moffat, J. B.
A quantum-theoretical study of some aromatic nitriles by the semiempirical LCAO–SCF–MO method. H. E. Popkie and J. B. Moffat, 624.
Surface chemistry and catalytic properties of boron phosphate. 1. Surface area and acidity. J. B. Moffat and G. L. Goltz, 1680.
Surface chemistry and catalytic properties of boron phosphate. II. A note on the formation of paramagnetic species with adsorbed aromatic compounds. J. B. Moffat and M. A. Haleem, 3495.
Moir, R. Y.
A series of model compounds for the study of aromatic reactions. S. Safe and R. Y. Moir, 337.
Monkovič, I.
Biosynthesis of berberine and berberastine. Incorporation of catecholamines. I. Monkovič and I. D. Spenser, 2017.
Monroy, A. C.
A chemical study of *Bocconia latisepala* Wats. X. A. Dominguez, J. G. Delgado, A. Monroy C., L. G. Armendariz, A. Alcala, J. Quevedo, and P. Rojas, 679.
Morgan, A. R.
The synthesis of β-D-glucopyranosyl 2-deoxy-α-D-*arabino*-hexopyranoside. R. U. Lemieux and A. R. Morgan, 2190.
The preparation and configurations of tri-*o*-acetyl-α-D-glucopyranose 1,2-(orthoesters). R. U. Lemieux and A. R. Morgan, 2199.
The abnormal conformations of pyridinium α-glycopyranosides. R. U. Lemieux and A. R. Morgan, 2205.
Mechanisms for the reactions of the anomeric tetra-*O*-acetyl-D-glucopyranosyl bromides with pyridine and 2-pyridone. R. U. Lemieux and A. R. Morgan, 2214.
Moroz, W. J.
On the formation of "Ag_2O_3" on silver electrodes. E. J. Casey and W. J. Moroz, 1199.
Morrison, D. N.
The photolysis of cyclopentanone and cyclobutanone. R. F. Klemm, D. N. Morrison, P. Gilderson, and A. T. Blades, 1934.
Morse, A. T.
Synthesis of isotopically labelled olefins via the Wittig reaction. J. G. Atkinson, M. H. Fisher, D. Horley, A. T. Morse, R. S. Stuart, and E. Synnes, 1614.
Morton, J. R.
Electron spin resonance spectra of ^{15}N-centered radicals at low temperatures. I. The radical NH_3^+ trapped in NH_4ClO_4. M. Fujimoto and J. R. Morton, 1012.
Electron spin resonance spectra of $S_2O_3^-$ in irradiated thiosulfate single crystals. J. R. Morton, 1948.

Mousa, H. H.
Studies on Stobbe condensation. Reactions of aldehydes and ketones with dimethyl methylsuccinate. A. M. El-Abbady and H. H. Mousa, 928.
Mukherji, S.
Studies on the range of ^{140}Ba in proton-induced fission of ^{238}U and a semi-empirical derivation of a general range–energy relation. S. Mukherji and L. Yaffe, 232.
Murphy, J. F.
Complexes of stannic iodide with aromatic hydrocarbons. J. F. Murphy and D. E. Baker, 1272.
Myron, J. J. J.
The radiolysis of ethanol. III. Liquid phase. J. J. J. Myron and G. R. Freeman, 381.
The radiolysis of ethanol. IV. Deuterated ethanols in the liquid and gas phases. J. J. J. Myron and G. R. Freeman, 1484.
Natsume, M.
Chasmanine and its structure. O. Achmatowicz, Jr., Y. Tsuda, L. Marion, T. Okamoto, M. Natsume, H.-H. Chang, and K. Kajima, 825.
Neilson, T.
A novel synthesis for aminodideoxy sugars. 3-Amino-2,3-dideoxy-D-*arabino*-hexose. H. H. Baer and T. Neilson, 840.
Reactions of nitro sugars. I. Some benzylidene and acyl derivatives of methyl 3-deoxy-3-nitro-D-hexopyranosides. H. H. Baer, F. Kienzle, and T. Neilson, 1829.
Nelson, N. A.
Synthesis of 8-aza-D-homo-18-norestrone methyl ether. N. A. Nelson and Y. Tamura, 1323.
Azasteroidal hormone analogues related to doisynolic acid. N. A. Nelson and J. M. Schuck, 1527.
Newton, J.
A new synthesis of alkyl fluorides. The pyrolysis of 2-alkylpseudouronium fluorides and fluoroborates. J. H. Amin, J. Newton, and F. L. M. Pattison, 3173.
Newton, R.
The electron-spin resonance spectra of some methylated anthrasemiquinones. Evidence for restricted rotation. R. M. Elofson, K. F. Schulz, B. E. Galbraith, and R. Newton, 1553.
Nichol, J. C.
Effect of electrolyte environment on divalent tartrate ion mobility. J. C. Nichol, D. G. Heikkinen, and G. E. Glass, 1476.
Nicholson, D.
Slip flow in long, single capillaries. Part II. Steady-state flow and specular reflection. R. M. Barrer and D. Nicholson, 896.
Slip flow in long, single capillaries. Part III. The transient state of flow. R. M. Barrer and D. Nicholson, 913.
Nickon, A.
Reactivity and geometry in allylic systems. III. Photosensitized oxygenation of cholest-4-ene, a steroid olefin with a conformationally flexible ring. A. Nickon and W. L. Mendelson, 1419.
Niclause, M.
La pyrolyse du propane et de l'isopentane. Influence de traces d'oxygène et effets de parois. M. Niclause, R. Martin, A. Combes, and M. Dzierzynski, 1120.
Niculescu-Duvăz, I.
Potential anticancer agents. I. Urethane-type nitrogen mustards of some synthetic estrogens. E. Grant and I. Niculescu-Duvăz, 1227.
Niedzielski, R. J.
Transition metal complexes of N-methyl-γ-butyrolactam. R. J. Niedzielski and G. Znider, 2618.
Nigam, I. C.
Essential oils and their constituents. XXVII. Composition of oil of gingergrass. M. C. Nigam, I. C. Nigam, and L. Levi, 521.
Essential oils and their constituents. XXIX. The essential oil of marihuana: composition of genuine Indian *Cannabis sativa* L. M. C. Nigam, K. L. Handa, I. C. Nigam, and L. Levi, 3372.
Nigam, M. C.
Essential oils and their constituents. XXVII. Composition of oil of gingergrass. M. C. Nigam, I. C. Nigam, and L. Levi, 521.
Essential oils and their constituents. XXIX. The essential oil of marihuana: composition of genuine Indian *Cannabis sativa* L. M. C. Nigam, K. L. Handa, I. C. Nigam, and L. Levi, 3372.
Nisbet, M.
Terpenoids. XII. The structure of chaparrin. T. A. Davidson, T. R. Hollands, P. de Mayo, and M. Nisbet, 2996.
Terpenoids. XIII. The stereochemistry of chaparrin, chaparrol, and related compounds. T. R. Hollands, P. de Mayo, M. Nisbet, and P. Crabbé, 3008.
Noreyko, J.
The solvolysis of arenesulfinates, sulfur–oxygen versus carbon–oxygen bond fission. D. Darwish and J. Noreyko, 1366.
Nyholm, R. S.
Oxygen-17 nuclear magnetic resonance study of the chromate reaction with dichromate. B. N. Figgis, R. G. Kidd, and R. S. Nyholm, 145.
O'Brien, R. N.
The dependence of concentration gradient on current density at working electrodes. R. N. O'Brien, C. A. Rosenfield, K. Kinoshita, W. F. Yakymyshyn, and J. Leja, 3304.

Occolowitz, J.
Steroids and related natural products. XXV. Photochemical transformation of 3β-nitrito-5α-lanostane. G. R. Pettit, R. E. Kadunce, P. Sunder-Plassmann, and J. Occolowitz, 2872.
O'Donnell, J. P.
The acidity of some substituted acetonitriles. R. Stewart, J. P. O'Donnell, and K. Bowden, 1225.
Ogawa, T.
Reactions of the ethyl radical. V. Addition to the monomethyl acrylonitriles. D. G. L. James and T. Ogawa, 640.
Ogryzlo, E. A.
Halogen atom reactions. III. Luminescence from the recombination of bromine atoms. D. B. Gibbs and E. A. Ogryzlo, 1905.
The yield of singlet oxygen in the reaction of chlorine with hydrogen peroxide. R. J. Browne and E. A. Ogryzlo, 2915.
Okamoto, T.
Chasmanine and its structure. O. Achmatowicz, Jr., Y. Tsuda, L. Marion, T. Okamoto, M. Natsume, H.-H. Chang, and K. Kajima, 825.
Olah, G. A.
Remarks on the nitronium salt nitration of toluene and benzene. G. A. Olah and N. A. Overchuk, 3279.
Onyszchuk, M.
The heat of formation of boron tribromide – acetonitrile. J. M. Miller and M. Onyszchuk, 1877.
Orphanos, D.
Quantitative preparation of chloro- and bromophthalazines. A. Hirsch and D. Orphanos, 2708.
Ouellet, L.
Étude des effets électrostatiques sur le mécanisme d'action catalytique de la phosphatase alcaline intestinale de veau. M. Lazdunski, J. Brouillard, and L. Ouellet, 2222.
Ouellette, R. J.
The chemical shift of the hydroxyl proton of phenols in dimethyl sulfoxide. R. J. Ouellette, 707.
Overchuk, N. A.
Remarks on the nitronium salt nitration of toluene and benzene. G. A. Olah and N. A. Overchuk, 3279.
Overend, W. G.
The oxidation of sugar acetals and thioacetals by *Acetobacter suboxydans*. D. T. Williams, and J. K. N. Jones, N. J. Dennis, R. J. Ferrier, and W. G. Overend, 955.
Paasivirta, J.
Complexes of boron trifluoride with fluoborates. S. Brownstein and J. Paasivirta, 1645.
Padova, J.
Ion–solvent interaction in mixed solvents. Part III. The molar refraction of electrolytes. J. Padova, 458.
Palmer, T. F.
Free radicals by mass spectrometry. XXXII. Thermal decomposition of cyclopentyl radicals. T. F. Palmer and F. P. Lossing, 565.
Pappas, A. C.
Independent yields of ^{131}Sb and ^{126}Sb in thermal neutron induced fission and their implication on the empirical Z_p function. P. O. Strom, G. R. Grant, and A. C. Pappas, 2493.
Parikh, V. M.
Oxidation of sugars with ruthenium dioxide – sodium periodate: a simple method for the preparation of substituted keto sugars. V. M. Parikh and J. K. N. Jones, 3452.
Parkhurst, R. M.
Synthesis of 1-aryl substituted 9*H*-pyrido[3,4-*b*]indoles. W. A. Skinner and R. M. Parkhurst, 2251.
Parkkari, J. H.
Preparation of antidotes for anticholinesterase poisoning. III. Esters of 1-arylcycloalkanecarboxylic acids. J. H. Parkkari, R. A. B. Bannard, and I. W. Coleman, 3119.
Parrick, J.
Thermal indolization of arylhydrazones. A. H. Kelly, D. H. McLeod, and J. Parrick, 296.
The use of dimethylformamide and of dimethyl sulfoxide in the preparation of 2,4-dinitrophenylhydrazones. J. Parrick and J. W. Rasburn, 3453.
Patel, C. C.
Pyridine N-oxide complex of titanyl perchlorate. V. Krishnan and C. C. Patel, 2685.
Patel, M. S.
Synthesis of 5-benzamido-5-deoxy-D-xylopyranose. M. S. Patel and J. K. N. Jones, 3105.
Patil, S. K.
Chemistry of the complexes of uranyl and plutonyl ions with organic ligands. P. V. Balakrishnan, S. K. Patil, H. D. Sharma, and H. V. Venkatasetty, 2052.
Pattern, B. A.
High energy modifications of the hydrates of zinc sulfate. J. W. S. Jamieson, R. A. LaMontagne, B. A. Pattern, and G. R. Brown, 3129.
Pattison, F. L. M.
Aliphatic vicinal fluorobromides: some preparations and reactions. F. L. M. Pattison, D. A. V. Peters, and F. H. Dean, 1689.
The synthesis of α-monofluoroalkanoic acids. F. L. M. Pattison, R. L. Buchanan, and F. H. Dean, 1700.
Synthesis of the isomeric methyl *vic*-bromofluoropropanoates. F. H. Dean and F. L. M. Pattison, 2415.
A new synthesis of alkyl fluorides. The pyrolysis of 2-alkylpseudouronium fluorides and fluoroborates. J. H. Amin, J. Newton, and F. L. M. Pattison, 3173.
Preparation of α-fluoro-γ-aminoacids. R. L. Buchanan and F. L. M. Pattison, 3466.

Paulus, K. F. G.
Electron spin resonance studies of radical anions and ion pairs in the pyrazine series. C. A. McDowell and K. F. G. Paulus, 224.
Peel, H. W.
Organic sulfur compounds. Part I. Benzothiazine hydroxamic acids and related compounds. R. T. Coutts, H. W. Peel, and E. M. Smith, 3221.
Peiluck, R. V.
Possible calorimetric method for measurement of the ligand field splitting energies for the hexaaquo cations of some transition elements. J. W. S. Jamieson, G. R. Brown, D. W. Gruener, R. V. Peiluck, and R. A. LaMontagne, 2148.
Pelletier, G. E.
Salting-in by quaternary ammonium salts. J. E. Desnoyers, G. E. Pelletier, and C. Jolicoeur, 3232.
Pépin, Y.
Substitutions en série naphtalènique. II. Dérivés du diméthoxy-2,7 naphtalène. J.-C. Richer and Y. Pépin, 3443.
Perlin, A. S.
Synthesis of β-D-mannose 1,2-orthoacetates. M. Mazurek and A. S. Perlin, 1918.
Tridentate complexes of periodate and some furanose derivatives. A. S. Perlin and E. von Rudloff, 2071.
Nuclear magnetic resonance spectral observations on the glycol-scission of deuterated D-glucose. W. Mackie and A. S. Perlin, 2645.
1,2-*O*-Isopropylidene-α-D-glucofuranose-5-*d* and -5,6,6′-d_3. W. Mackie and A. S. Perlin, 2921.
Perlmutter-Hayman, B.
Nucleophilic catalysis in the hydrolysis of dichromate. B. Perlmutter-Hayman and M. A. Wolff, 2913.
Perrault, G.
Synthèses de la *tert*-butyl-4 dimethyl-2,2 cyclohexanone et de ses dérivés. J.-C. Richer and G. Perrault, 18.
Perry, M. B.
The water-soluble polysaccharides of dermatophytes. IV. Galactomannans I from *Trichophyton granulosum*, *Trichophyton interdigitale*, *Microsporum quinckeanum*, *Trichophyton rubrum*, and *Trichophyton schönleinii*. C. T. Bishop, M. B. Perry, F. Blank, and F. P. Cooper, 30.
The chemistry of D-apiose. Part II. The configuration of D-apiose in apiin. R. K. Hulyalkar, J. K. N. Jones, and M. B. Perry, 2085.
The preparation of L-lyxuronic acid, L-lyxose, and 5-deoxy-L-lyxose. R. K. Hulyalkar and M. B. Perry, 3241.
Pesteil, L.
Structure vibrationnelle des spectres d'absorption dans l'ultraviolet de quelques dérivés halogénés du benzène. P. Pesteil, H. F. Shurvell, and L. Pesteil, 3133.
Pesteil, P.
Structure vibrationnelle des spectres d'absorption dans l'ultraviolet de quelques dérivés halogénés du benzène. P. Pesteil, H. F. Shurvell, and L. Pesteil, 3133.
Peters, D. A. V.
Aliphatic vicinal fluorobromides: some preparations and reactions. F. L. M. Pattison, D. A. V. Peters, and F. H. Dean, 1689.
Peters, F. M.
The structure of bis-dimethylaminoberyllium. N. R. Fetter and F. M. Peters, 1884.
Peterson, D. J.
Coordination compounds of olefins with anhydrous silver salts. II. An infrared and nuclear magnetic resonance investigation of silver tetrafluoroborate – olefin complexes. H. W. Quinn, J. S. McIntyre, and D. J. Peterson, 2896.
Pettit, G. R.
A proton magnetic resonance study of N-bis(2-haloethyl)amines. G. R. Pettit, J. A. Settepani, and R. A. Hill, 1792.
Antineoplastic agents. XV. Intramolecular reactions of N-phenyl-N′-bis(2-chloroethyl)urea. G. R. Pettit, D. S. Blonda, and R. A. Upham, 1798.
Reaction of amines with dimethylthioformamide. G. R. Pettit and L. R. Garson, 2640.
Steroids and related natural products. XXV. Photochemical transformation of 3β-nitrito-5α-lanostane. G. R. Pettit, R. E. Kadunce, P. Sunder-Plassmann, and J. Occolowitz, 2872.
Pews, R. G.
Reaction mechanism studies. 3. Solvent effects and the nature of the transition state in the diaxial → diequatorial rearrangement. J. F. King and R. G. Pews, 847.
Phillips, L. F.
The lifetime of the $A^3\Sigma_u^+$ state of N_2. L. F. Phillips, 369.
Direct observation of $A^3\Sigma_u^+$ nitrogen molecules in the N–I_2 flame. D. I. Walton, M. J. McEwan, and L. F. Phillips, 3095.
Pichai, R.
Molecular force field for sulfur tetrafluoride. M. G. K. Pillai, K. Ramaswamy, and R. Pichai, 463.
Pieroni, J. J.
An electron spin resonance study of trapped electrons formed at 77.5 °K by gamma irradiation of an organic glass. D. R. Smith and J. J. Pieroni, 876.
Electron spin resonance determination of the radiolytic yields of trapped electrons and other species in an organic glass. D. R. Smith and J. J. Pieroni, 2141.
Piers, E.
Some aspects of the chemistry of catharanthine and cleavamine. J. P. Kutney, R. T. Brown, and E. Piers, 1545.

Pillai, M. G. K.
Molecular force field for sulfur tetrafluoride. M. G. K. Pillai, K. Ramaswamy, and R. Pichai, 463.
Placzek, D. W.
Intramolecular hydrogen transfer in mercury photosensitization of pentene-1. D. W. Placzek and B. S. Rabinovitch, 820.
Pollock, D.
Reactions of palladium compounds with acetylenes. II. Tetrakis(*p*-chlorophenyl)cyclobutadiene palladium complexes. P. M. Maitlis, D. Pollock, M. L. Games, and W. J. Pryde, 470.
Popkie, H. E.
A quantum-theoretical study of some aromatic nitriles by the semiempirical LCAO–SCF–MO method. H. E. Popkie and J. B. Moffat, 624.
Pradhan, S. K.
Ceanothus alkaloids. I. Isolation, separation, and characterization. E. W. Warnhoff, S. K. Pradhan, and J. C. N. Ma, 2594.
Price, S. J. W.
Pressure-independent flow system pyrolysis of dimethyl cadmium. M. Krech and S. J. W. Price, 1929.

Erratum: Primary process studies by monoisotopic photosensitization on the reactions of Hg $6(^3P_1)$ atoms with alkyl chlorides. J. K. S. Wan, O. P. Strausz, W. F. Allen, and H. E. Gunning, 318.

Photochemical synthesis of vinylthiols. O. P. Strausz, T. Hikida, and H. E. Gunning, 717.

The Hg $6(^3P_1)$ photosensitization of chlordifluoromethane. M. G. Bellas, O. P. Strausz, and H. E. Gunning, 1022.

The Hg $6(^3P_1)$ photosensitized decomposition of cyclohexene vapor. G. R. De Maré, O. P. Strausz, and H. E. Gunning, 1329.

The photolysis of carbon disulfide and carbon disulfide – oxygen mixtures. M. de Sorgo, A. J. Yarwood, O. P. Strausz, and H. E. Gunning, 1886.

An electron spin resonance study of ultraviolet photolyzed solid carbonyl sulfide. D. A. Stiles, R. Kewley, O. P. Strausz, and H. E. Gunning, 2442.

Strom, P. O.

Independent yields of ^{124}Sb and ^{126}Sb in thermal neutron induced fission and their implication on the empirical Z_p function. P. O. Strom, G. R. Grant, and A. C. Pappas, 2493.

Stuart, R. S.

Synthesis of isotopically labelled olefins via the Wittig reaction. J. G. Atkinson, M. H. Fisher, D. Horley, A. T. Morse, R. S. Stuart, and E. Synnes, 1614.

Styan, G. E.

Addition of fluoroacetylenes to group V hydrides. W. R. Cullen, D. S. Dawson, and G. E. Styan, 3392.

Sukava, A. J.
Subsolutions in multicomponent systems: applications to some ternary aqueous acid sulfate systems at univariance. A. J. Sukava, 1036.
Sun, K.
The use of polyacrylamide gels for chromatography of proteins. K. Sun and A. H. Sehon, 969.
Sunder-Plassmann, P.
Steroids and related natural products. XXV. Photochemical transformation of 3β-nitrito-5α-lanostane. G. R. Pettit, R. E. Kadunce, P. Sunder-Plassmann, and J. Occolowitz, 2872.
Suprunchuk, T.
Localization of the C=Se vibration in the infrared spectra of selenosemicarbazones. B. A. Gingras, T. Suprunchuk, and C. H. Bayley, 1650.
Sutarno
Determination of the crystal structure of erbium titanate, $Er_2Ti_2O_7$, by X-ray and neutron diffraction. O. Knop, F. Brisse, L. Castelliz, and Sutarno, 2812.
Swaroop, B.
The preparation of anhydrous zirconium dichloride. B. Swaroop and S. N. Flengas, 2115.
Synnes, E.
Synthesis of isotopically labelled olefins via the Wittig reaction. J. G. Atkinson, M. H. Fisher, D. Horley, A. T. Morse, R. S. Stuart, and E. Synnes, 1614.
Szarek, W. A.
Carbohydrates containing nitrogen in a five-membered ring and an attempted synthesis of a carbohydrate with nitrogen in a seven-membered ring. W. A. Szarek and J. K. N. Jones, 2345.
Szell, T.
Erratum: New nitrochalcones. VII. T. Szell, A. M. Eastham, and G. Sipos, 2134.
Tamura, Y.
Synthesis of 8-aza-D-homo-18-norestrone methyl ether. N. A. Nelson and Y. Tamura, 1323.
Taylor, J. B.
The arsenides of tungsten and molybdenum: WAs_2, W_2As_3, $MoAs_2$, Mo_2As_3, and Mo_4As_4. J. B. Taylor, L. D. Calvert, and M. R. Hunt, 3045.
Tee, O. S.
The effect of alpha and alpha′ deuterium upon the p.m.r. of 2-butanone. O. S. Tee and J. Warkentin, 2424.
Temin, S. C.
Isomeric 1,3-cyclopentanedicarboxylic acids from the oxidative ozonization of norbornene. S. C. Temin and M. E. Baum, 705.
Tertzakian, G.
Aromatic substitution. Part IX. On the mechanism of the Pschorr cyclization. R. A. Abramovitch and G. Tertzakian, 940.
Theophanides, T.
Hydrolysis constants of some platinum(II) chloro complexes containing unsaturated ligands. A. D. Allen and T. Theophanides, 290.
Thibert, R. J.
Synthesis of some alpha-substituted cystines. R. J. Thibert, J. F. G. Diederich, and K. G. Rutherford, 206.
The reaction of some aromatic acids with sodium azide in a trifluoroacetic acid – trifluoroacetic anhydride medium. K. G. Rutherford, S. Y.-S. Ing, and R. J. Thibert, 541.
Thoburn, W. J.
Application of differential thermal analysis to the dissociation of MnO_2 and Mn_2O_3. T. Matsushima and W. J. Thoburn, 1723.
Thode, H. G.
Carbon-13 isotope effects in systems containing carbon dioxide, bicarbonate, carbonate, and metal ions. H. G. Thode, M. Shima, C. E. Rees, and K. V. Krishnamurty, 582.
Erratum: Carbon-13 isotope effects in systems containing carbon dioxide, bicarbonate, carbonate, and metal ions. H. G. Thode, M. Shima, C. E. Rees, and K. V. Krishnamurty, 2451.
Sulfur isotope effects in the hydrogen ion decomposition of thiosulfate. U. Agarwala, C. E. Rees, and H. G. Thode, 2802.
Thompson, R. C.
Magnetic studies on copper(II) trifluoroacetate. R. C. Thompson and D. B. W. Yawney, 1240.
Thonstad, J.
The solubility of aluminium in $NaF–AlF_3–Al_2O_3$ melts. J. Thonstad, 3429.
Timell, T. E.
A study of the pectin present in the bark of amabilis fir (*Abies amabilis*). S. S. Bhattacharjee and T. E. Timell, 758.
The acid hydrolysis of glycosides. II. Effect of substituents at C-5. T. E. Timell, W. Enterman, F. Spencer, and E. J. Soltes, 2296.
Tobias, R. S.
A comparison of the Raman crystal and solution spectra of the hexaniobate and hexatantalate ions. R. S. Tobias, 1222.
Tolgyesi, W. S.
Relative reactivity of toluene–benzene in nitronium tetrafluoroborate nitration. Limitation of the competitive method of rate determination in fast reactions. W. S. Tolgyesi, 343.
Torrible, E. G.
The infrared spectra of some titanium(IV) complexes with primary diamines. D. Horley and E. G. Torrible, 3201.
The reaction of some titanium and zirconium halides with cyclic organic ligands containing oxygen and sulfur. E. C. Alyea and E. G. Torrible, 3468.

Tremblay, G.
Cation exchange in anhydrous ethylenediamine. W. R. Heumann, O. Dionne, and G. Tremblay, 1096.
Tremblay, M.
Formation des dérivés pentafluorosulfures éthylèniques, dièniques et acétylèniques. M. Tremblay, 219.
Spectres infrarouges de composés riches en azote. M. Tremblay, 1154.
Synthesis of some tetrazole salts. M. Tremblay, 1230.
Trotter, J.
X-ray study of liquid $AsBr_3$. R. Hoge and J. Trotter, 2692.
Tsuda, Y.
Chasmanine and its structure. O. Achmatowicz, Jr., Y. Tsuda, L. Marion, T. Okamoto, M. Natsume, H.-H. Chang, and K. Kajima, 825.
The oxidation of diterpenoid alkaloids. O. Achmatowicz, Jr., Y. Tsuda, and L. Marion, 2336.
Tuck, D. G.
Nuclear magnetic resonance spectra and conductivities of some metal acetylacetonates. A. J. Carty, D. G. Tuck, and E. Bullock, 2559.
Tulloch, A. P.
The oxygenated fatty acids from the oil of the spores of *Lycopodium* species. A. P. Tulloch, 415.
Turvey, J. R.
The reaction of galactose with hydrazine at elevated temperature. J. K. N. Jones, P. Reid, and J. R. Turvey, 983.
Tyrrell, J.
Complex formation between propargyl chloride and benzene. J. Tyrrell, 783.
Uma, V.
The reaction of sulfonylimido intermediates with aromatic compounds. R. A. Abramovitch, J. Roy, and V. Uma, 3407.
Unrau, A. M.
Biosynthesis of colchicine. Tracer studies with cinnamate-3-^{14}C, methanol-^{14}C, and ornithine-2-^{14}C. R. D. Hill and A. M. Unrau, 709.
The structure of a synthetic arabinan. G. G. S. Dutton and A. M. Unrau, 924.
Analysis of products from periodate oxidation and from methylation of a rhamnan. G. G. S. Dutton and A. M. Unrau, 1738.
Upham, R. A.
Antineoplastic agents. XV. Intramolecular reactions of N-phenyl-N′-bis(2-chloroethyl)urea. G. R. Pettit, D. S. Blonda, and R. A. Upham, 1798.
Valleau, J. P.
Supersonic molecular beams. II. Theory of the formation of supersonic molecular beams. J. P. Valleau and J. M. Deckers, 6.
Van Der Hoeven, T.
Synthesis of derivatives of 1,2-dichloro-4-benzenesulfonamido-5-nitrobenzene and their use in the chemotherapy of spontaneous cancers. D. W. Woolley and T. Van Der Hoeven, 1454.
Venkatasetty, H. V.
Chemistry of the complexes of uranyl and plutonyl ions with organic ligands. P. V. Balakrishnan, S. K. Patil, H. D. Sharma, and H. V. Venkatasetty, 2052.
Vekris, S. L.
Nuclear magnetic resonance spectroscopy of some selenium compounds. T. Birchall, R. J. Gillespie, and S. L. Vekris, 1672.
Vining, L. C.
Studies in the biochemistry of microorganisms. Part 117. Sepedonin, a tropolone metabolite of *Sepedonium chrysospermum* Fries. P. V. Divekar, H. Raistrick, T. A. Dobson, and L. C. Vining, 1835.
Vinje, M. G.
Pyrazolines. IV. Rearrangement of alkyl groups during the pyrolysis of 4,4-dialkyl-3-cyano-3-carbomethoxy-Δ^1-pyrazolines. D. E. McGreer, R. S. McDaniel, and M. G. Vinje, 1389.
Pyrazolines. V. Ring closure to oxygen in the pyrolysis of 3-acetyl-Δ^1-pyrazolines. D. E. McGreer, N. W. K. Chiu, and M. G. Vinje, 1398.
Pyrazolines. VI. The stereochemistry in the pyrolysis of pyrazolines for the C_3 and C_5 positions of the pyrazoline molecule. D. E. McGreer, N. W. K. Chiu, M. G. Vinje, and K. C. Wong, 1407.
Photorearrangement of 2,3-dimethyl-4,5-dihydrofuran and 2-methyl-4,5-dihydrofuran. D. E. McGreer, M. G. Vinje, and R. S. McDaniel, 1417.
von Rudloff, E.
Gas–liquid chromatography of terpenes. Part XIII. The volatile oil of the leaves of *Juniperus horizontalis* Moench. F. M. Couchman and E. von Rudloff, 1017.
Permanganate–periodate oxidation. VI. The oxidation of various aliphatic compounds. E. von Rudloff, 1784.
Tridentate complexes of periodate and some furanose derivatives. A. S. Perlin and E. von Rudloff, 2071.
Permanganate–periodate oxidation. Part VII. The oxidation of some acyclic monoterpenes. E. von Rudloff, 2660.
Wai, H.
The ionization of some typical weak bases in concentrated perchloric acid. K. Yates and H. Wai, 2131.
Walton, D. I.
Direct observation of $A^3\Sigma_u^+$ nitrogen molecules in the N–I_2 flame. D. I. Walton, M. J. McEwan, and L. F. Phillips, 3095.
Wan, J. K. S.
Erratum: Primary process studies by monoisotopic photosensitization on the reactions of Hg $6(^3P_1)$ atoms with alkyl chlorides. J. K. S. Wan, O. P. Strausz, W. F. Allen, and H. E. Gunning, 318.

Wang, I. C.
Ultraviolet study of the ionization of bisulfate ion. J. T. Edward and I. C. Wang, 2867.
Warkentin, J.
The effect of alpha and alpha′ deuterium upon the p.m.r. of 2-butanone. O. S. Tee and J. Warkentin, 2424.
Reactions of ethyldiazoacetate with cyclopentadiene. Synthesis of the epimeric ethyl bicyclo[3.1.0]hex-2-ene-6-carboxylates. J. Warkentin, E. Singleton, and J. F. Edgar, 3456.
Warnhoff, E. W.
On the use of nuclear magnetic resonance for the detection, estimation, and characterization of N-methyl groups. J. C. N. Ma and E. W. Warnhoff, 1849.
Ceanothus alkaloids. I. Isolation, separation, and characterization. E. W. Warnhoff, S. K. Pradhan, and J. C. N. Ma, 2594.
Desert plant constituents. II. Ocotillol: an intermediate in the oxidation of hydroxy isoöctenyl side chains. E. W. Warnhoff and C. M. M. Halls, 3311.
Watts, H.
Diffusion in multicomponent gaseous mixtures. Part 2. Diffusion of xenon-133 in binary mixtures of xenon with helium, neon, argon, and krypton. H. Watts, 431.
Weiler, L. S. J.
Structural determinations by nuclear magnetic resonance. 3-Substituted propionyl chlorides. G. H. Schmid and L. S. J. Weiler, 1242.
Weinberg, N. L.
The oxymercuration of 4-methylenecyclohexanemethanol. N. L. Weinberg and G. F Wright, 24.
Weinberger, M. A.
Solvent effects in the nuclear magnetic resonance spectra of benzalmalononitriles. M. A. Weinberger, R. M. Heggie, and H. L. Holmes, 2585.
Nuclear magnetic resonance and infrared studies of acylated imidazolidinones and imidazolidinethiones. R. Greenhalgh and M. A. Weinberger, 3340.
Weir, M. R. S.
Some base-catalyzed condensations of systems of the form $R_1R_2C{=}C(CN)_2$. M. R. S. Weir and J. B. Hyne, 772.
Werner, A. E.
An apparatus for studying hydrogen sulfide oxidation kinetics. A. E. Werner, 3096.
Westland, A. D.
Addition compounds of titanium(IV) chloride containing elements of groups V and VI as donor atoms. A. D. Westland and L. Westland, 426.
Westland, L.
Addition compounds of titanium(IV) chloride containing elements of groups V and VI as donor atoms. A. D. Westland and L. Westland, 426.
Whalley, E.
Infrared spectra and structure of polyaldehydes. VI. Polyfluoral. W. K. Busfield and E. Whalley, 2289.
Effect of pressure and temperature on the rate of the acid-catalyzed hydration of ethylene. B. T. Baliga and E. Whalley, 2453.
Wheeler, D. M. S.
The dihydroxystrychnines. D. M. S. Wheeler, M. C. Smith, A. M. Kneece, and J. B. McMaster, 985.
Wiles, D. R.
The dissolution of copper in ammoniacal potassium bromate solutions. M. Kulkarni and D. R. Wiles, 1978.
Wilkening, V. G.
Erratum: Effects of pH in the γ-radiolysis of aqueous solutions of cysteine and methyl mercaptan. D. A. Armstrong and V. G. Wilkening, 993.
Williams, D. T.
The oxidation of sugar acetals and thioacetals by *Acetobacter suboxydans*. D. T. Williams, J. K. N. Jones, N. J. Dennis, R. J. Ferrier, and W. G. Overend, 955.
Williams, J. L. R.
Photochemical transformations of some 4′-amino-2-styrylpyridines and their salts. J. L. R. Williams, J. M. Carlson, R. E. Adel, and G. A. Reynolds, 1345.
Williams, R. E.
Terpenoids. VIII. The immediate precursors of helminthosporal and helminthosporol. P. de Mayo, R. E. Williams, and E. Y. Spencer, 1357.
Williams, S. C.
Direct displacement of a primary tolyl-*p*-sulfonyloxy group by the methoxide ion: a more direct route to 5-*O*-methyl-L-arabinose and 3,5-di-*O*-methyl-L-arabinose. S. C. Williams and J. K. N. Jones, 3440.
Willis, C. J.
Fully fluorinated alkoxides. Part I. Trifluoromethoxides of alkali metals. M. E. Redwood and C. J. Willis, 1893.
The reaction of hexafluoroacetone with some silanes. A. F. Janzen and C. J. Willis, 3063.
Wolfe, S.
Cyclohexene-3,3,6,6-d_4. A useful compound for the study of mechanism and structure. S. Wolfe and P. G. C. Campbell, 1184.
Wolff, M. A.
Nucleophilic catalysis in the hydrolysis of dichromate. B. Perlmutter-Hayman and M. A. Wolff, 2913.
Wong, E. W. C.
α-Deuterium kinetic isotope effects in solvolyses of *endo*-norbornyl *p*-bromobenzenesulfonate. C. C. Lee and E. W. C. Wong, 2254.

Wong, K C.
Pyrazolines. VI. The stereochemistry in the pyrolysis of pyrazolines for the C_3 and C_5 positions of the pyrazoline molecule. D. E. McGreer, N. W. K. Chiu, M. G. Vinje, and K. C. Wong, 1407.
Woo, C.
The conversion of meta- and para-substituted benzaldoxime arenesulfonates to nitriles. R. J. Crawford and C. Woo, 1534.
Ortho participation in the conversion of *syn*-benzaldoxime esters to nitriles. R. J. Crawford and C. Woo, 3178.
Wood, R. H.
Studies of sodium cuprate(III) stability. J. S. Magee, Jr. and R. H. Wood, 1234.
Woolley, D. W.
Synthesis of derivatives of 1,2-dichloro-4-benzenesulfonamido-5-nitrobenzene and their use in the chemotherapy of spontaneous cancers. D. W. Woolley and T. Van Der Hoeven, 1454.
Wright, G. F
The oxymercuration of 4-methylenecyclohexanemethanol. N. L. Weinberg and G. F Wright, 24.
The ammonomercuration of cyclohexene. D. Chow, J. H. Robson, and G. F Wright, 312.
Wyman, D. P.
The chlorination of monofluoroacetone with sulfuryl chloride. D. P. Wyman, B. L. Shapiro, and P. R. Kaufman, 2432.
Yaffe, L.
Studies on the range of ^{140}Ba in proton-induced fission of ^{238}U and a semi-empirical derivation of a general range–energy relation. S. Mukherji and L. Yaffe, 232.
Mass distribution in thermal neutron fission of ^{239}Pu. D. A. Marsden and L. Yaffe, 249.
Yakymyshyn, W. F.
The dependence of concentration gradient on current density at working electrodes. R. N. O'Brien, C. A. Rosenfield, K. Kinoshita, W. F. Yakymyshyn, and J. Leja, 3304.
Yalpani, M.
Reaction of aralkyl ketone oximes with carbon monoxide and hydrogen to yield formamides and secondary amines. A. Rosenthal and M. Yalpani, 711.
Reaction of aralkyl ketone phenylhydrazones with carbon monoxide; thermal indolization of aralkyl ketone phenylhydrazones. A. Rosenthal and M. Yalpani, 3449.
Yarwood, A. J.
The photolysis of carbon disulfide and carbon disulfide – oxygen mixtures. M. de Sorgo, A. J. Yarwood, O. P. Strausz, and H. E. Gunning, 1886.
Yates, B. L.
Pyrolysis studies. XIV. The pyrolysis of *t*-butyl benzoates. G. G. Smith and B. L. Yates, 702.
Yates, K.
The ionization behavior of amides in concentrated sulfuric acids. II. Applications of the H_A function to rates and equilibria. K. Yates and J. B. Stevens, 529.
The ionization of some typical weak bases in concentrated perchloric acid. K. Yates and H. Wai, 2131.
The H_A acidity function and the mechanism of amide hydrolysis in hydrochloric acid. K. Yates and J. C. Riordan, 2328.
Yates, P.
1,4-Dimethylbicyclo[2.2.1]heptane derivatives. P. Yates and T. R. Lynch, 2306.
Yawney, D. B. W.
Magnetic studies on copper(II) trifluoroacetate. R. C. Thompson and D. B. W. Yawney, 1240.
Yonemoto, T.
The amino proton shifts of some substituted anilines in cyclohexane. T. Yonemoto, W. F. Reynolds, H. M. Hutton, and T. Schaefer, 2668.
Young, D. M.
The adsorption of krypton and ethylene on evaporated films of magnesium. D. M. Young and C. D. Anderson, 309.
Young, R.
Structural features of two extracellular polysaccharides from *Serratia marcescens*. R. Young and G. A. Adams, 2929.
Constitution of an extracellular acidic glucomannan from *Serratia marcescens*. G. A. Adams and R. Young, 2940.
Young, R. A.
Iodine-catalyzed recombination of atomic nitrogen. R. A. Young, 3238.
Zazaris, D. A.
The synthesis of 2-aminobenzenethiol hydrochlorides. R. L. Dannley and D. A. Zazaris, 2610.
Ziauddin
Quinoxaline derivatives. VIII. The effect of electron-donating groups on the formation of certain quinoxalinecarboxyanilide *N*-oxides and their rearrangement. Y. Ahmad, M. S. Habib, M. Iqbal, M. I. Qureshi, and Ziauddin, 3424.
Ziegler, P.
11α,12α-Epoxy-3,20-dioxopregnane. P. Ziegler, 988.
Zitko, V.
Fractionation of pectins from sunflowers, sugar beets, apples, and citrus fruits. V. Zitko and C. T. Bishop, 3206.
Znider, G.
Transition metal complexes of N-methyl-γ-butyrolactam. R. J. Niedzielski and G. Znider, 2618.

SUBJECT INDEX

The titles of articles published in Volume 43 are listed below under the following categories.

Amino acids and peptides
Carbohydrates
Catalysis
Chromatography and extraction
Crystal structure
Electrochemistry
Electron spin resonance
Experimental methods
Free radicals
Inorganic compounds: reaction and synthesis
Kinetics and mechanisms
Magnetic resonance
Mechanisms of organic reactions
Molecular complexes
Natural products
Nuclear chemistry
Organometallic compounds
Photochemistry
Physical properties
Polarography
Polymers
Radiation chemistry
Solutions
Spectroscopy
Surfaces
Synthesis of organic compounds
Terpenes and steroids
Theoretical studies
Thermochemistry

Amino acids and peptides

Acylguanidines as intermediates in peptide syntheses. E. Hoffman and D. Diller, 3103.
Erratum: Amino acids and peptides. II. Synthesis of ϵ-*N*-methyl-L-lysine and related compounds. L. Benoiton, 993.
Conformational studies on synthetic poly-α-amino acids: the helical sense of poly-L-tryptophan: optical rotatory dispersion studies. G. D. Fasman, M. Landsberg, and M. Buchwald, 1588.
Hydration of purines, pyrimidines, nucleosides, and nucleotides. M. Falk, 314.
An improved synthesis of ϵ-N-acetyl-L-lysine and similar compounds. L. Benoiton and J. Leclerc, 991.
Synthèses de peptides contenant des thioacides. C. Berse and G. Dupuis, 2174.
Synthesis of α-alkyl-substituted amino acids and derivatives. C. J. Abshire and L. Berlinguet, 1232.
Synthesis of some alpha-substituted cystines. R. J. Thibert, J. F. G. Diederich, and K. G. Rutherford, 206.

Carbohydrates

The abnormal conformations of pyridinium α-glycopyranosides. R. U. Lemieux and A. R. Morgan, 2205.
Acetonation of aldose diethyl thioacetals. P. A. J. Gorin, 2078.
The acid hydrolysis of glycosides. II. Effect of substituents at C-5. T. E. Timell, W. Enterman, F. Spencer, and E. J. Soltes, 2296.
The alcoholysis of trialkylalkoxysilanes. Part I. A kinetic study of the methanolysis of methyl 2,3,4,6-tetra-*O*-trimethylsilyl α-D-glucopyranoside to form methyl 2,3,4-tri-*O*-trimethylsilyl α-D-glucopyranoside. A. G. McInnes, 1998.
The alcoholysis of trialkylalkoxysilanes. Part II. The preparation and chemistry of methyl 2,3,4-tri-*O*-trimethylsilyl-α-D-glucopyranoside. D. T. Hurst and A. G. McInnes, 2004.
Analysis of products from periodate oxidation and from methylation of a rhamnan. G. G. S. Dutton and A. M. Unrau, 1738.
The *C*- and *O*-benzylation of L-ascorbic acid. K. G. A. Jackson and J. K. N. Jones, 450.
Carbohydrates containing nitrogen in a five-membered ring and an attempted synthesis of a carbohydrate with nitrogen in a seven-membered ring. W. A. Szarek and J. K. N. Jones, 2345.
The chemistry of D-apiose. Part II. The configuration of D-apiose in apiin. R. K. Hulyalkar, J. K. N. Jones, and M. B. Perry, 2085.
Constitution of an arabinogalactomannan from honey. I. R. Siddiqui, 421.
Constitution of an extracellular acidic glucomannan from *Serratia marcescens*. G. A. Adams and R. Young, 2940.
Direct displacement of a primary tolyl-*p*-sulfonyloxy group by the methoxide ion: a more direct route to 5-*O*-methyl-L-arabinose and 3,5-di-*O*-methyl-L-arabinose. S. C. Williams and J. K. N. Jones, 3440.
An exocellular mannan, alternately linked 1,3-β and 1,4-β from *Rhodotorula glutinis*. P. A. J. Gorin, K. Horitsu, and J. F. T. Spencer, 950.
Formation of cyclic *O*-2′-hydroxyethylidene acetals from polyalcohols of 4-*O*-linked polysaccharides. P. A. J. Gorin and J. F. T. Spencer, 2978.
Formation of *O*-β-D-glucopyranosyl- and *O*-β-D-galactopyranosyl-myo-inositols by glycosyl transfer. P. A. J. Gorin, K. Horitsu, and J. F. T. Spencer, 2259.
Fractionation of pectins from sunflowers, sugar beets, apples, and citrus fruits. V. Zitko and C. T. Bishop, 3206.
Glycosidation of sugars. III. Gas–liquid chromatography of the methyl glycosides of D-galactose, D-glucose, and D-mannose as their trimethylsilyl ethers. V. Smirnyagin, C. T. Bishop, and F. P. Cooper, 3109.
1,2-*O*-Isopropylidene-α-D-glucofuranose-5-*d* and -5,6,6′-d_3. W. Mackie and A. S. Perlin, 2921.
Mechanism of action of UDPGal-4-epimerase: isotope effect studies. R. D. Bevill III, E. A. Hill, F. Smith, and S. Kirkwood, 1577.
The mechanism of the anomerization of the tetra-*O*-acetyl-D-glucopyranosyl chlorides. R. U. Lemieux and J. Hayami, 2162.

The mechanism of the dehydrobromination of tetra-*O*-acetyl-α-D-glucopyranosyl bromide. R. U. Lemieux and D. R. Lineback, 94.
Mechanisms for the reactions of the anomeric tetra-*O*-acetyl-D-glucopyranosyl bromides with pyridine and 2-pyridone. R. U. Lemieux and A. R. Morgan, 2214.
The mechanisms of the halogenations and halogenomethoxylations of D-glucal triacetate, D-galactal triacetate, and 3,4-dihydropyran. R. U. Lemieux and B. Fraser-Reid, 1460.
A novel synthesis for aminodideoxy sugars. 3-Amino-2,3-dideoxy-D-*arabino*-hexose. H. H. Baer and T. Neilson, 840.
Nuclear magnetic resonance spectral observations on the glycol-scission of deuterated D-glucose. W. Mackie and A. S. Perlin, 2645.
The oxidation of sugar acetals and thioacetals by *Acetobacter suboxydans*. D. T. Williams, J. K. N. Jones, N. J. Dennis, R. J. Ferrier, and W. G. Overend, 955.
Oxidation of sugars with ruthenium dioxide – sodium periodate: a simple method for the preparation of substituted keto sugars. V. M. Parikh and J. K. N. Jones, 3452.
The preparation and configurations of tri-*O*-acetyl-α-D-glucopyranose 1,2-(orthoesters). R. U. Lemieux and A. R. Morgan, 2199.
The preparation of L-lyxuronic acid, L-lyxose, and 5-deoxy-L-lyxose. R. K. Hulyalkar and M. B. Perry, 3241.
Proton magnetic resonance spectra of D-glucopyranose polymers. C. A. Glass, 2652.
The reaction of galactose with hydrazine at elevated temperature. J. K. N. Jones, P. Reid, and J. R. Turvey, 983.
The reaction of unsaturated carbohydrates with carbon monoxide and hydrogen. IV. Structure and stereochemistry of anhydrodeoxyheptitols from 3,4,6-tri-*O*-acetyl-D-galactal. A. Rosenthal and D. Abson, 1985.
The reaction of unsaturated carbohydrates with carbon monoxide and hydrogen. V. Absolute stereochemistry of anhydrodeoxyheptitols from 3,4,6-tri-*O*-acetyl-D-glucal. Stereochemistry of hydroformylation. Conformational analysis. A. Rosenthal and H. J. Koch, 1375.
Reactions of nitro sugars. I. Some benzylidene and acyl derivatives of methyl 3-deoxy-3-nitro-D-hexopyranosides. H. H. Baer, F. Kienzle, and T. Neilson, 1829.
Reactions of nitro sugars. II. The conversion of methyl 6-deoxy-6-nitrohexopyranosides into deoxynitroinositols by alkaline glycoside cleavage. H. H. Baer and W. Rank, 3330.
Reactions of nitro sugars. III. Instability of 6-deoxy-6-nitro-aldohexoses at intermediate pH values. H. H. Baer and W. Rank, 3462.
Reactions of sugar chlorosulfates. Part V. The synthesis of chlorodeoxy sugars. H. J. Jennings and J. K. N. Jones, 2372.
Reactions of sugar chlorosulfates. Part VI. The structure of unsaturated chlorodeoxy sugars. H. J. Jennings and J. K. N. Jones, 3018.
Structural features of two extracellular polysaccharides from *Serratia marcescens*. R. Young and G. A. Adams, 2929.
The structure of a synthetic arabinan. G. G. S. Dutton and A. M. Unrau, 924.
A study of the pectin present in the bark of amabilis fir (*Abies amabilis*). S. S. Bhattacharjee and T. E. Timell, 758.
Substitutional and configurational effects on chemical shift in pyranoid carbohydrate derivatives. R. U. Lemieux and J. D. Stevens, 2059.
Synthesis of 4-acetamido-4-deoxy-sugars. A. J. Dick and J. K. N. Jones, 977.
Synthesis of 3-amino-2,3-dideoxy-D-*lyxo*-hexose. H. H. Baer and F. Kienzle, 3074.
Synthesis of anhydrodideoxyhexitols related to anhydrodeoxyhexitols from oxo reaction of 3,4-di-*O*-acetyl-D-xylal. A. Rosenthal and D. Abson, 1318.
Synthesis of 5-benzamido-5-deoxy-D-xylopyranose. M. S. Patel and J. K. N. Jones, 3105.
Synthesis of 4-*O*-β-D-galactopyranosyl-D-galactose. E. J. C. Curtis and J. K. N. Jones, 2508.
The synthesis of β-D-glucopyranosyl 2-deoxy-α-D-*arabino*-hexopyranoside. R. U. Lemieux and A. R. Morgan, 2190.
Synthesis of β-D-mannose 1,2-orthoacetates. M. Mazurek and A. S. Perlin, 1918.
Tridentate complexes of periodate and some furanose derivatives. A. S. Perlin and E. von Rudloff, 2071.
The water-soluble polysaccharides of dermatophytes. IV. Galactomannans I from *Trichophyton granulosum*, *Trichophyton interdigitale*, *Microsporum quinckeanum*, *Trichophyton rubrum*, and *Trichophyton schönleinii*. C. T. Bishop, M. B. Perry, F. Blank, and F. P. Cooper, 30.

Catalysis

Autoxidation reactions catalyzed by cobalt acetate bromide. A. S. Hay and H. S. Blanchard, 1306.
Electrophilic catalysis in solvolytic reactions. VII. Solvent effect. R. Anantaraman and K. Saramma, 1770.

Chromatography and extraction

Gas–liquid chromatography of terpenes. Part XIII. The volatile oil of the leaves of *Juniperus horizontalis* Moench. F. M. Couchman and E. von Rudloff, 1017.
Paper chromatography of some amine hydrochlorides and acetates in acidic solvent systems. R. A. B. Bannard and A. A. Casselman, 395.
Sample injection in programmed temperature gas chromatography and its significance for trace analysis. L. W. Hollingshead, H. W. Habgood, and W. E. Harris, 1560.
The use of polyacrylamide gels for chromatography of proteins. K. Sun and A. H. Sehon, 969.

Crystal structure

Addendum: Evidence for $ZnF_2.2H_2O$. E. A. Secco and O. K. Srivastava, 2926.
The arsenides of tungsten and molybdenum: WAs_2, W_2As_3, $MoAs_2$, Mo_2As_3, and Mo_4As_4. J. B. Taylor, L. D. Calvert, and M. R. Hunt, 3045.

The crystal structure and phase transitions of β-$Zn_3P_2O_7$. C. Calvo, 1147.
The crystal structure of α-$Zn_3(PO_4)_2$. C. Calvo, 436.
Determination of the crystal structure of erbium titanate, $Er_2Ti_2O_7$, by X-ray and neutron diffraction. O. Knop, F. Brisse, L. Castelliz, and Sutarno, 2812.
Evidence for $ZnF_2.2H_2O$. Dehydration and X-ray diffraction studies. E. A. Secco and R. R. Martin, 175.
Refinement of the crystal structure of β-$Mg_2P_2O_7$. C. Calvo, 1139.
Structures of mercury mercaptides. Part II. X-ray structural analysis of mercury ethylmercaptide. D. C. Bradley and N. R. Kunchur, 2786.
X-ray powder patterns for the identification of some *n*-alkanone semicarbazones. J. Radell, B. W. Brodman, and K. Kramer, 1661.

Electrochemistry
Chemical structure and adsorption of organic molecules at the polarized mercury–electrolyte interface. R. G. Barradas and P. G. Hamilton, 2468.
Considerations of adsorbed ionic intermediates on the AgO/Ag_2O electrode in aqueous alkaline solution. R. G. Barradas and G. H. Fraser, 446.
Determination of the field dependence of the Tafel slope for the steady-state anodic oxidation of aluminium. M. J. Dignam, D. Goad, and M. Sole, 800.
The dependence of concentration gradient on current density at working electrodes. R. N. O'Brien, C. A. Rosenfield, K. Kinoshita, W. F. Yakymyshyn, and J. Leja, 3304.
Effect of electrolyte environment on divalent tartrate ion mobility. J. C. Nichol, D. G. Heikkinen, and G. E. Glass, 1476.
The electrical conductivities of some tetra-*n*-alkylammonium salts in acetonitrile. A. C. Harkness and H. M. Daggett, Jr., 1215.
Electrochemical studies on titanium in molten LiCl–KCl eutectic. R. Baboian, D. L. Hill, and R. A. Bailey, 197.
Electrocrystallization. I. Surface diffusion. S. K. Rangarajan, 1052.
Entropy differences for some related pairs of complex ions. J. Lin and W. G. Breck, 766.
On the formation of "Ag_2O_3" on silver electrodes. E. J. Casey and W. J. Moroz, 1199.
On a platinum–rhodium – oxygen electrode in silicate melts. R. E. Ranford and S. N. Flengas, 2879.

Electron spin resonance
Alicyclic ketyls. I. Angular dependence of hyperfine coupling and conformational mobility of cyclohexanone ketyls. J. W. Lown, 2571.
Alicyclic ketyls. II. Temperature dependence of the conformational mobility of medium-sized rings. J. W. Lown, 3294.
Electron spin resonance determination of the radiolytic yields of trapped electrons and other species in an organic glass. D. R. Smith and J. J. Pieroni, 2141.
The electron spin resonance spectra of dinitronaphthalene anion radicals. P. H. H. Fischer and C. A. McDowell, 3400.
Electron spin resonance spectra of ^{15}N-centered radicals at low temperatures. I. The radical NH_3^+ trapped in NH_4ClO_4. M. Fujimoto and J. R. Morton, 1012.
Electron spin resonance spectra of $S_2O_3^-$ in irradiated thiosulfate single crystals. J. R. Morton, 1948.
The electron-spin resonance spectra of some methylated anthrasemiquinones. Evidence for restricted rotation. R. M. Elofson, K. F. Schulz, B. E. Galbraith, and R. Newton, 1553.
The electron spin resonance spectrum of $N^+(CH_3)_3$ in γ-irradiated betaine. R. Drews, D. Cadena, Jr., and J. Rowlands, 2439.
Electron spin resonance studies of radical anions and ion pairs in the pyrazine series. C. A. McDowell and K. F. G. Paulus, 224.
An electron spin resonance study of trapped electrons formed at 77.5 °K by gamma irradiation of an organic glass. D. R. Smith and J. J. Pieroni, 876.
An electron spin resonance study of ultraviolet photolyzed solid carbonyl sulfide. D. A. Stiles, R. Kewley, O. P. Strausz, and H. E. Gunning, 2442.
Spectroscopic studies of the reversible reaction between 2,2-diphenyl-1-picrylhydrazyl and 2,4,6-tri-*t*-butylphenol. P. B. Ayscough and K. E. Russell, 3039.

Experimental methods
An adiabatic solution calorimeter used for measuring the molar excess enthalpy of the system carbon tetrachloride – benzene at 25 °C. J. E. Bennett and G. C. Benson, 1912.
An apparatus for studying hydrogen sulfide oxidation kinetics. A. E. Werner, 3096.
Labelling of nucleosides with tritium. G. A. LePage and I. G. Junga, 1279.
A l.e.t. independent dosimeter based on the chemiluminescent determination of H_2O_2. W. A. Armstrong and W. G. Humphreys, 2576.

Free radicals
Electron spin resonance spectra of ^{15}N-centered radicals at low temperatures. I. The radical NH_3^+ trapped in NH_4ClO_4. M. Fujimoto and J. R. Morton, 1012.
Electron spin resonance studies of radical anions and ion pairs in the pyrazine series. C. A. McDowell and K. F. G. Paulus, 224.
Free radicals by mass spectrometry. XXXII. Thermal decomposition of cyclopentyl radicals. T. F. Palmer and F. P. Lossing, 565.
Reactions of the ethyl radical. IV. Addition to vinyl monomers. D. G. L. James and D. MacCallum, 633.
Reactions of the ethyl radical. V. Addition to the monomethyl acrylonitriles. D. G. L. James and T. Ogawa, 640.

Reactions of the ethyl radical. VI. Addition to conjugated dienes. A. C. R. Brown and D. G. L. James, 1102.
The reactions of methylene radicals with acetaldehyde and propionaldehyde. M. H. Back, 106.
The reactivity of the cyclic polyenes towards free radicals. III. Addition of the ethyl radical. A. C. R. Brown and D. G. L. James, 1110.
Spectroscopic studies of the reversible reaction between 2,2-diphenyl-1-picrylhydrazyl and 2,4,6-tri-*t*-butylphenol. P. B. Ayscough and K. E. Russell, 3039.
A study of some reactions of the cyclopentyl radical. A. S. Gordon, 570.
Substituted quinodimethans. VIII. Salts derived from the 7,7,8,8-tetracyanoquinodimethan anion–radical and benzologues of quaternary pyrazinium. L. R. Melby, 1448.

Inorganic compounds: reaction and synthesis

Addendum: Evidence for $ZnF_2.2H_2O$. E. A. Secco and O. K. Srivastava, 2926.
Coordination complexes of niobium pentachloride with triphenyl derivatives of group V elements. J. Desnoyers and R. Rivest, 1879.
The dissolution of copper in ammoniacal potassium bromate solutions. M. Kulkarni and D. R. Wiles, 1978.
Effect of water vapor on the formation of $CaSO_4.\frac{1}{2}H_2O$ modifications. R. A. Kuntze, 2522.
Evidence for $ZnF_2.2H_2O$. Dehydration and X-ray diffraction studies. E. A. Secco and R. R. Martin, 175.
Fully fluorinated alkoxides. Part I. Trifluoromethoxides of alkali metals. M. E. Redwood and C. J. Willis, 1893.
Nuclear magnetic resonance spectroscopy of some selenium compounds. T. Birchall, R. J. Gillespie, and S. L. Vekris, 1672.
Nucleophilic catalysis in the hydrolysis of dichromate. B. Perlmutter-Hayman and M. A. Wolff, 2913.
Preparation and properties of diethyl(diphenylphosphinyl)aluminium. A. W. Johnson, W. D. Larson, and G. H. Dahl, 1338.
The preparation of anhydrous zirconium dichloride. B. Swaroop and S. N. Flengas, 2115.
Pyridine N-oxide complex of titanyl perchlorate. V. Krishnan and C. C. Patel, 2685.
The reaction of hexafluoroacetone with some silanes. A. F. Janzen and C. J. Willis, 3063.
The reaction of some titanium and zirconium halides with cyclic organic ligands containing oxygen and sulfur. E. C. Alyea and E. G. Torrible, 3468.
The structure of bis-dimethylaminoberyllium. N. R. Fetter and F. M. Peters, 1884.
Studies of sodium cuprate(III) stability. J. S. Magee, Jr. and R. H. Wood, 1234.
Synthesis in aqueous solutions of binary compounds of the transition metals with group VA and VIA elements. G. E. Cranton and R. D. Heyding, 2027.
Tellurate complexes of nickel, palladium, and platinum, and a periodate compound of nickel. M. W. Lister and P. McLeod, 1720.

Kinetics and mechanisms

Absolute rate constants for hydrocarbon autoxidation. I. Styrene. J. A. Howard and K. U. Ingold, 2729.
Absolute rate constants for hydrocarbon autoxidation. II. Deutero styrenes and ring-substituted styrenes. J. A. Howard and K. U. Ingold, 2737.
Addendum: The chromic acid oxidation of aryl trifluoromethyl alcohols: isotope and substituent effects. R. Stewart and D. G. Lee, 3128.
Carbon-13 isotope effects in systems containing carbon dioxide, bicarbonate, carbonate, and metal ions. H. G. Thode, M. Shima, C. E. Rees, and K. V. Krishnamurty, 582.
The chemistry of singlet and triplet methylene. R. F. W. Bader and J. I. Generosa, 1631.
The chromic acid oxidation of 2-propanol in trifluoroacetic acid. D. G. Lee and D. T. Johnson, 1952.
Decomposition of the ethyl radical and the mechanism of the pyrolysis of *n*-butane. J. H. Purnell and C. P. Quinn, 721.
α-Deuterium kinetic isotope effects in solvolyses of *endo*-norbornyl *p*-bromobenzenesulfonate. C. C. Lee and E. W. C. Wong, 2254.
Effect of pressure and temperature on the rate of the acid-catalyzed hydration of ethylene. B. T. Baliga and E. Whalley, 2453.
An electron impact study of some C_8H_{10} isomers. F. Meyer, P. Haynes, S. McLean, and A. G. Harrison, 211.
Erratum: Carbon-13 isotope effects in systems containing carbon dioxide, bicarbonate, carbonate, and metal ions. H. G. Thode, M. Shima, C. E. Rees, and K. V. Krishnamurty, 2451.
Étude des effets électrostatiques sur le mécanisme d'action catalytique de la phosphatase alcaline intestinale de veau. M. Lazdunski, J. Brouillard, and L. Ouellet, 2222.
Halogen atom reactions. III. Luminescence from the recombination of bromine atoms. D. B. Gibbs and E. A. Ogryzlo, 1905.
Hydrolysis constants of some platinum(II) chloro complexes containing unsaturated ligands. A. D. Allen and T. Theophanides, 290.
Hydrolysis of a series of primary alkyl chlorosulfates: entropy of activation as a criterion of fragmentation in solvolytic reactions. E. Buncel and J. P. Millington, 556.
Kinetics and mechanisms of the thermal decomposition of propionaldehyde. Part I. The uninhibited reaction. K. J. Laidler and M. Eusuf, 268.
Kinetics and mechanisms of the thermal decomposition of propionaldehyde. Part II. The reaction in the presence of nitric oxide. K. J. Laidler and M. Eusuf, 278.
The kinetics of the inhibited autoxidation of tetralin. II. J. A. Howard and K. U. Ingold, 2724.
Kinetics of vapor-phase hydrocarbon–ozone reactions. J. J. Bufalini and A. P. Altshuller, 2243.
The lifetime of the $A^3\Sigma_u^+$ state of N_2. L. F. Phillips, 369.
Photolysis of hexafluoroazomethane near room temperature. J. R. Dacey, R. F. Mann, and G. O. Pritchard, 3215.

Pressure-independent flow system pyrolysis of dimethyl cadmium. M. Krech and S. J. Price, 1929.
A pulsed ion source for the study of unimolecular and bimolecular reactions of gas-phase ions. T. W. Shannon, F. Meyer, and A. G. Harrison, 159.
La pyrolyse du propane et de l'isopentane. Influence de traces d'oxygène et effets de parois. M. Niclause, R. Martin, A. Combes, and M. Dzierzynski, 1120.
The pyrolysis of trimethylthallium. M. G. Jacko and S. J. W. Price, 1961.
Pyrolysis studies. XIV. The pyrolysis of *t*-butyl benzoates. G. G. Smith and B. L. Yates, 702.
The reaction of active nitrogen with ethanol. P. A. Gartaganis, 935.
The reaction of active nitrogen with mixtures of ethylene and nitric oxide. E. Fersht and R. A. Back, 1899.
The reactions of methylene radicals with acetaldehyde and propionaldehyde. M. H. Back, 106.
The reactions of 2-methyl ethylenimine and azacyclobutane with atomic hydrogen. J. W. S. Jamieson, G. R. Brown, and W. K. Hancock, 1973.
Reactivity of CH and NH bonds in ethylenimine. P. Gray and A. Jones, 3485.
The reactivity of the cyclic polyenes towards free radicals. II. Metathesis with the ethyl radical. A. C. R. Brown and D. G. L. James, 660.
Rearrangement reactions following electron impact on ethyl and isopropyl esters. A. G. Harrison and E. G. Jones, 960.
Secondary kinetic isotope effects in bimolecular nucleophilic substitutions. II. α-Deuterium effects in Menschutkin reactions of methyl iodide. K. T. Leffek and J. W. MacLean, 40.
Solvolysis in light and heavy water. VI. The role of initial state structure. P. M. Laughton and R. E. Robertson, 154.
Solvolysis of alkyl chlorosulfates. Part I. Reaction of *n*-propyl chlorosulfate with nucleophiles. E. Buncel and J. P. Millington, 547.
Studies in the Wagner–Meerwein rearrangement. Part V. Rates of formolysis of some 9-alkyl-9-fluorenylmethyl tosylates. F. A. L. Anet and P. M. G. Bavin, 2465.
Sulfur isotope effects in the hydrogen ion decomposition of thiosulfate. U. Agarwala, C. E. Rees, and H. G. Thode, 2802.
Surface effects in the uninhibited and the inhibited pyrolyses of isomeric hexanes. Parts I–III. *n*-Hexane, 2-methyl pentane, 3-methyl pentane. J. Chrysochoos and W. A. Bryce, 2092.
Surface effects in the uninhibited and the inhibited pyrolyses of isomeric hexanes. Part V. 2,2-Dimethyl butane (neohexane). J. Chrysochoos and W. A. Bryce, 2457.
The thermal decomposition of methyl hydroperoxide. A. D. Kirk, 2236.
The transmission of polar effects. Part II. The kinetics of esterification with diazodiphenylmethane and the ionization of 3-substituted acrylic acids. K. Bowden, 3354.
The unimolecular decomposition of methyl chloride. W. Forst and P. St. Laurent, 3052.
The Wallach rearrangement. Part II. Kinetics and mechanism of the acid-catalyzed rearrangement of azoxybenzene. E. Buncel and B. T. Lawton, 862.
The yield of singlet oxygen in the reaction of chlorine with hydrogen peroxide. R. J. Browne and E. A. Ogryzlo, 2915.

Magnetic resonance

Addendum: A simplified procedure for the analysis of complex nuclear magnetic resonance spectra. I. The principles of sub-spectral analysis. P. Diehl, R. G. Jones, and H. J. Bernstein, 1891.
The amino proton shifts of some substituted anilines in cyclohexane. T. Yonemoto, W. F. Reynolds, H. M. Hutton, and T. Schaefer, 2668.
The chemical shift of the hydroxyl proton of phenols in dimethyl sulfoxide. R. J. Ouellette, 707.
cis–trans Isomerism in 2-arylidene-3,3-diphenylindan-1-ones. J. A. Bevan, P. E. Gagnon, and I. D. Rae, 2612.
^{35}Cl and ^{37}Cl magnetic resonance of simple chlorine compounds. Y. Saito, 2530.
^{13}C n.m.r. studies. Part III. Carbon-13 n.m.r. spectra of substituted acetophenones. K. S. Dhami and J. B. Stothers, 479.
^{13}C n.m.r. studies. Part IV. Carbon-13 n.m.r. spectra of some alkyl phenyl ketones. K. S. Dhami and J. B. Stothers, 498.
^{13}C n.m.r. studies. Part V. Carbon-13 spectra of some substituted styrenes. K. S. Dhami and J. B. Stothers, 510.
^{13}C n.m.r. studies. Part VI. Carbon-13 spectra of $\alpha\beta$-unsaturated carbonyl compounds. D. H. Marr and J. B. Stothers, 596.
Concerning the ortho shift in proton and fluorine magnetic resonance of some conjugated hydrocarbons. F. Hruska, H. M. Hutton, and T. Schaefer, 2392.
Configuration and conformation of 2,3-dichloro-1,4-dioxane, m.p. 52°. R. R. Fraser and C. Reyes-Zamora, 3445.
Correlation of ethylenic proton coupling constants with the electronegativity of substituents. Interpretation of the deviations of bromo and iodo substituents. F. Hruska, G. Kotowycz, and T. Schaefer, 2827.
Correlations of proton coupling constants in the cyclopropane ring with electronegativity. Consideration of the proton resonance spectrum of cyclopropyllithium. T. Schaefer, F. Hruska, and G. Kotowycz, 75.
The effect of alpha and alpha′ deuterium upon the p.m.r. of 2-butanone. O. S. Tee and J. Warkentin, 2424.
Fast rearrangement of *exo*-norbornanol in strong acid solutions. G. Fraenkel, P. D. Ralph, and J. P. Kim, 674.
Hindered internal rotation in boron halide complexes of N,N-dimethylformamide. E. S. Gore, D. J. Blears, and S. S. Danyluk, 2135.
$J_{^{13}C-H}$ for substituted aldehydes. R. M. Hammaker, 2916.
Keto–enol tautomerism in β-dicarbonyls studied by nuclear magnetic resonance spectroscopy. II. Solvent effects on proton chemical shifts and on equilibrium constants. M. T. Rogers and J. L. Burdett, 1516.

A linear correlation of proton chemical shifts in some alkyl chlorides and hydrocarbons with the occupation number of the hydrogen orbitals. F. Hruska, G. Kotowycz, and T. Schaefer, 3188.
The magnetic anistropy of the carbonyl bond. D. L. Hooper and R. Kaiser, 2363.
The nature of association between molecules of N-methylpyrrole. H. J. Anderson, 2387.
The n.m.r. spectrum of 2,3,5-trimethyl-2,3,5-tricyanohexane. Unusual temperature dependence of magnetic nonequivalence. P. Smith and J. J. McLeskey III, 2418.
Nuclear magnetic resonance investigations of some Group V metal fluorides and oxyions. J. V. Hatton, Y. Saito, and W. G. Schneider, 47.
Nuclear magnetic resonance spectra and conductivities of some metal acetylacetonates. A. J. Carty, D. G. Tuck, and E. Bullock, 2559.
Nuclear magnetic resonance spectral observations on the glycol-scission of deuterated D-glucose. W. Mackie and A. S. Perlin, 2645.
Proton magnetic resonance spectra of D-glucopyranose polymers. C. A. Glass, 2652.
Nuclear magnetic resonance spectroscopy of some selenium compounds. T. Birchall, R. J. Gillespie, and S. L. Vekris, 1672.
Nuclear magnetic resonance studies of the protonation of weak bases in fluorosulfuric acid. V. Ketones, carboxylic acids, and some other oxygen bases. T. Birchall and R. J. Gillespie, 1045.
Oxygen-17 nuclear magnetic resonance study of the chromate reaction with dichromate. B. N. Figgis, R. G. Kidd, and R. S. Nyholm, 145.
A proton magnetic resonance study of N-bis(2-haloethyl)amines. G. R. Pettit, J. A. Settepani, and R. A. Hill, 1792.
A proton magnetic resonance study of sodium 3,5,5-trimethyl hexanoate. T. J. R. Cyr and B. A. Dunell, 1237.
Proton spin relaxation by paramagnetic molecular oxygen. M. E. Mirhej, 1130.
Reactions of amides and related compounds. I. N.m.r. (proton) investigation of *N,N*-dimethylformamide – Lewis acid adducts and remarks on the relative strength of Lewis acids. S. J. Kuhn and J. S. McIntyre, 375.
Reactions of amides and related compounds. II. Nuclear magnetic resonance investigation of adducts of *N*-methylformamide with HCl and HBr and *N,N*-dimethylformamide with protonating acids and silver salts. S. J. Kuhn and J. S. McIntyre, 995.
The relative signs of the proton coupling constants in diketene and vinyl formate. F. Hruska, H. M. Hutton, and T. Schaefer, 1942.
A simplified procedure for the analysis of complex nuclear magnetic resonance spectra. I. The principles of sub-spectral analysis. P. Diehl, R. G. Jones, and H. J. Bernstein, 81.
A simplified procedure for the analysis of complex nuclear magnetic resonance spectra. II. The analysis of symmetrical trifluorobenzene, the AA′A″XX′X″ system. R. G. Jones, R. C. Hirst, and H. J. Bernstein, 683.
Solvent dependence of chemical shift and coupling constants in *p*-nitroanisole. H. M. Hutton and T. Schaefer, 3116.
Solvent effects in the nuclear magnetic resonance spectra of benzalmalononitriles. M. A. Weinberger, R. M. Heggie, and H. L. Holmes, 2585.
Structural determinations by nuclear magnetic resonance. 3-Substituted propionyl chlorides. G. H. Schmid and L. S. J. Weiler, 1242.
A study of tautomerism in cyclic β-diketones by proton magnetic resonance. N. Cyr and L. W. Reeves, 3057.
On the use of nuclear magnetic resonance for the detection, estimation, and characterization of N-methyl groups. J. C. N. Ma and E. W. Warnhoff, 1849.

Mechanisms of organic reactions

The action of Fenton's reagent on cyclopropylcarbinol. C. C. Lee, A. J. Cessna, and M. K. Frost, 2924.
β-Aminocrotononitrile. I. Geometrical isomerism and some reactions. E. Bullock and B. Gregory, 332.
Antineoplastic agents. XV. Intramolecular reactions of N-phenyl-N′-bis(2-chloroethyl)urea. G. R. Pettit, D. S. Blonda, and R. A. Upham, 1798.
Aromatic substitution. Part VIII. Some aspects of the mechanism of the Tschitschibabin reaction. R. A. Abramovitch, F. Helmer, and J. G. Saha, 725.
Aromatic substitution. Part IX. On the mechanism of the Pschorr cyclization. R. A. Abramovitch and G. Tertzakian, 940.
Arylation of aromatic compounds with benzenediazonium borofluoride. Nature of the arylating species. R. A. Abramovitch and J. G. Saha, 3269.
The chemistry of the aminochromes. Part VI. The reaction of adrenochrome with glutathione. G. L. Mattock and R. A. Heacock, 119.
The chlorination of monofluoroacetone with sulfuryl chloride. D. P. Wyman, B. L. Shapiro, and P. R. Kaufman, 2432.
Concerning the existence of 2-(2-nitrovinyl)benzoic acid. A contribution to the alkaline elimination in β-substituted nitro compounds. H. H. Baer and F. Kienzle, 190.
Contribution a l'étude du mécanisme d'oxydation chromique des alcools secondaires. J.-C. Richer and C. Gilardeau, 538.
The conversion of meta- and para-substituted benzaldoxime arenesulfonates to nitriles. R. J. Crawford and C. Woo, 1534.
Cyclohexane compounds. V. The reaction of 1-methoxycyclohexene-2 with aqueous N-bromosuccinimide. The 1-methoxy-2-bromo-3-hydroxycyclohexanes. R. A. B. Bannard, A. A. Casselman, and L. R. Hawkins, 2398.

Cyclohexene-3,3,6,6-d_4. A useful compound for the study of mechanism and structure. S. Wolfe and P. G. C. Campbell, 1184.
The dihydroxystrychnines. D. M. S. Wheeler, M. C. Smith, A. M. Kneece, and J. B. McMaster, 985.
9,10-Dimethyl- and 9,10-diphenyl-9,10-dihydro-9,10-ethanoanthracene by Friedel–Crafts cyclialkylations of 1,4-diarylsubstituted-1,4-diols. L. R. C. Barclay and R. A. Chapman, 1754.
Effect of changing pH upon the rate and mechanism of decarboxylation of substituted anthranilic acids. G. E. Dunn, P. Leggate, and I. E. Scheffler, 3080.
Electronic effects in E2 reactions. II. *t*-Butoxide-induced eliminations of 2-methyl-3-pentyl arenesulfonates. A. K. Colter and D. R. McKelvey, 1282.
Fast rearrangement of *exo*-norbornanol in strong acid solutions. G. Fraenkel, P. D. Ralph, and J. P. Kim, 674.
Formation des dérivés pentafluorosulfures éthylèniques, dièniques et acétylèniques. M. Tremblay, 219.
Heterocycloniumyl zwitterions. Part I. The alkali-catalyzed cleavage of 2-hydroxymethyl- and 2-formylpyridinium cations. S. Golding and A. R. Katritzky, 1250.
Hydrogenolysis by $AlCl_3$–$LiAlH_4$ of ether solutions of *cis* and *trans* isomers of 2,4-disubstituted-1,3-dioxolanes. B. E. Leggetter and R. K. Brown, 1030.
The interaction of the acetates and carbamates of some heterocyclic alcohols with acetylcholinesterase. K. B. Shaw, 3264.
Isobenzofurane, a transient intermediate. L. F. Fieser and M. J. Haddadin, 1599.
The mechanism of the dehydrobromination of tetra-*O*-acetyl-α-D-glucopyranosyl bromide. R. U. Lemieux and D. R. Lineback, 94.
The methylation of the resorcinolate dianion. I. The effects of solvent and base and the alkylation sequence. A. R. Stein, 1493.
The methylation of the resorcinolate dianion. II. Per-methylated resorcinol: 2,2,4,6,6-pentamethylcyclohex-4-en-1,3-dione. A. R. Stein, 1508.
Nucleophilic addition of triethylamine to dimethyl acetylenedicarboxylate. R. J. Alaimo and D. G. Farnum, 700.
Ortho participation in the conversion of *syn*-benzaldoxime esters to nitriles. R. J. Crawford and C. Woo, 3178.
The Orton rearrangement in aprotic solvents. Part II. The acid-catalyzed bromination of anisole by a series of 4-substituted N-bromoacylanilides. J. M. W. Scott and J. G. Martin, 732.
The oxidation of methyl fumaropimarate with lead tetraacetate. W. A. Ayer and C. E. McDonald, 1429.
Permanganate–periodate oxidation. VI. The oxidation of various aliphatic compounds. E. von Rudloff, 1784.
Permanganate–periodate oxidation. Part VII. The oxidation of some acyclic monoterpenes. E. von Rudloff, 2660.
Photo-addition of *N*-nitrosodialkylamines to cyclohexene. Y. L. Chow, 2711.
The photolysis of maleic hydrazide: evidence for an intermolecular hydrogen transfer. A. Stoessl, 2430.
Photorearrangement of 2,3-dimethyl-4,5-dihydrofuran and 2-methyl-4,5-dihydrofuran. D. E. McGreer, M. G. Vinje, and R. S. McDaniel, 1417.
The preparation and hydrolysis of alkyl hydrogen methylphosphonates. L. Keay, 2637.
Pyrazolines. IV. Rearrangement of alkyl groups during the pyrolysis of 4,4-dialkyl-3-cyano-3-carbomethoxy-Δ^1-pyrazolines. D. E. McGreer, R. S. McDaniel, and M. G. Vinje, 1389.
Pyrazolines. V. Ring closure to oxygen in the pyrolysis of 3-acetyl-Δ^1-pyrazolines. D. E. McGreer, N. W. K. Chiu, and M. G. Vinje, 1398.
Pyrazolines. VI. The stereochemistry in the pyrolysis of pyrazolines for the C_3 and C_5 positions of the pyrazoline molecule. D. E. McGreer, N. W. K. Chiu, M. G. Vinje, and K. C. Wong, 1407.
Pyrrole chemistry. IV. The preparation and some reactions of brominated pyrrole derivatives. H. J. Anderson and S.-F. Lee, 409.
Reaction mechanism studies. 3. Solvent effects and the nature of the transition state in the diaxial → diequatorial rearrangement. J. F. King and R. G. Pews, 847.
Reaction of amines with dimethylthioformamide. G. R. Pettit and L. R. Garson, 2640.
Reaction of dihydropyran with ethyl azidoformate. I. Brown and O. E. Edwards, 1266.
The reaction of ozone with dimethyllaurylamine. G. P. Shulman, 3069.
Reactions of ozonides. III. Ozonolysis of ethyl 10-undecenoate in ethanol. D. G. M. Diaper and D. L. Mitchell, 319.
The reaction of some aromatic acids with sodium azide in a trifluoroacetic acid – trifluoroacetic anhydride medium. K. G. Rutherford, S. Y.-S. Ing, and R. J. Thibert, 541.
The reaction of sulfonylimido intermediates with aromatic compounds. R. A. Abramovitch, J. Roy, and V. Uma, 3407.
Reactivities in photosensitized olefin oxidations. K. R. Kopecky and H. J. Reich, 2265.
Reactivity and geometry in allylic systems. III. Photosensitized oxygenation of cholest-4-ene, a steroid olefin with a conformationally flexible ring. A. Nickon and W. L. Mendelson, 1419.
Rearrangement studies with ^{14}C. XXII. Solvolyses of 1-^{14}C-ethyl *p*-toluenesulfonate. C. C. Lee and M. K. Frost, 526.
Rearrangement studies with ^{14}C. XXIV. Solvolyses of 2-(α-naphthyl)-1-^{14}C-ethyl *p*-toluenesulfonate. C. C. Lee and A. G. Forman, 3387.
Relative reactivity of toluene–benzene in nitronium tetrafluoroborate nitration. Limitation of the competitive method of rate determination in fast reactions. W. S. Tolgyesi, 343.
Remarks on the nitronium salt nitration of toluene and benzene. G. A. Olah and N. A. Overchuk, 3279.
The solvolysis of arenesulfinates, sulfur–oxygen versus carbon–oxygen bond fission. D. Darwish and J. Noreyko, 1366.
Some base-catalyzed condensations of systems of the form $R_1R_2C{=}C(CN)_2$. M. R. S. Weir and J. B. Hyne, 772.
Some transformations of tetracycline at the 4-position. R. K. Blackwood and C. R. Stephens, 1382.

The stereochemistry of halogen displacement by nitrate ion: racemization and retention of configuration in the synthesis of dinitrate esters. L. D. Hayward, M. Jackson, and I. G. Csizmadia, 1656.
Stereochemistry of the reduction of cyclic ketones with the pyridine-*n*-butyllithium adduct: steric approach and product development controls. R. A. Abramovitch, W. C. Marsh, and J. G. Saha, 2631.
Steroids. IX. The solvolysis of 4,4-diethylcholesteryl methanesulfonate. D. N. Gupta, G. Schilling, and G. Just, 792.
Studies on Stobbe condensation. Reactions of aldehydes and ketones with dimethyl methylsuccinate. A. M. El-Abbady and H. H. Mousa, 928.
Substituent effects in the fluorene series. I. Synthesis and acetolysis of some dinitro-9-fluorenyl *p*-toluenesulfonates. F. F. Guzik and A. K. Colter, 1441.
Sulfonium salt solvolysis. Part V. Model systems for biological transmethylation. J. B. Hyne and J. H. Jensen, 57.
Thermal indolization of arylhydrazones. A. H. Kelly, D. H. McLeod, and J. Parrick, 296.
Thermal rearrangement of benzyldimethylamine oxide. G. P. Shulman, P. Ellgen, and M. Connor, 3459.

Molecular complexes

Addition compounds of titanium(IV) chloride containing elements of groups V and VI as donor atoms. A. D. Westland and L. Westland, 426.
Chemistry of the complexes of uranyl and plutonyl ions with organic ligands. P. V. Balakrishnan, S. K. Patil, H. D. Sharma, and H. V. Venkatasetty, 2052.
Chloride and sulfate ion association with some lanthanide and actinide ions. P. G. Manning, 2911.
Complexes of boron trifluoride with fluoborates. S. Brownstein and J. Paasivirta, 1645.
Complexes of stannic iodide with aromatic hydrocarbons. J. F. Murphy and D. E. Baker, 1272.
Complex formation between propargyl chloride and benzene. J. Tyrrell, 783.
Coordination complexes of group (IV) halides. Preparation of the complexes of titanium tetrachloride, titanium tetrabromide, and tin tetrachloride with some thio-, isothio-, and iso-cyanate ligands. S. C. Jain and R. Rivest, 787.
Coordination compounds of olefins with anhydrous silver salts. II. An infrared and nuclear magnetic resonance investigation of silver tetrafluoroborate – olefin complexes. H. W. Quinn, J. S. McIntyre, and D. J. Peterson, 2896.
The copper(II) *syn*-phenyl-2-pyridyl ketoxime system. Part I. T. L. Meek and G. E. Cheney, 64.
Effects of the electronic band shape of palladium metal on the proton model for hydrogen absorption. J. W. Simons and T. B. Flanagan, 1665.
Hindered internal rotation in boron halide complexes of N,N-dimethylformamide. E. S. Gore, D. J. Blears, and S. S. Danyluk, 2135.
Hydrolysis constants of some platinum(II) chloro complexes containing unsaturated ligands. A. D. Allen and T. Theophanides, 290.
Infrared spectra of tris-ethylenediamine complexes of ruthenium(II). A. D. Allen and C. V. Senoff, 888.
The mono-oxalato complexes of iron(III). Part I. Equilibria. R. F. Bauer and W. MacF. Smith, 2755.
The mono-oxalato complexes of iron(III). Part II. Kinetics of formation. R. F. Bauer and W. MacF. Smith, 2763.
Pyridine N-oxide complex of titanyl perchlorate. V. Krishnan and C. C. Patel, 2685.
Rare-earth acetate ion association. P. G. Manning, 3476.
The ratios of stepwise stability constants. III. The rare-earth α-hydroxymonocarboxylates. P. G. Manning, 3258.
Reactions of amides and related compounds. I. N.m.r. (proton) investigation of *N,N*-dimethylformamide – Lewis acid adducts and remarks on the relative strength of Lewis acids. S. J. Kuhn and J. S. McIntyre, 375.
Reactions of amides and related compounds. II. Nuclear magnetic resonance investigation of adducts of *N*-methylformamide with HCl and HBr and *N,N*-dimethylformamide with protonating acids and silver salts. S. J. Kuhn and J. S. McIntyre, 995.
Reactions of palladium compounds with acetylenes. II. Tetrakis(*p*-chlorophenyl)cyclobutadiene palladium complexes. P. M. Maitlis, D. Pollock, M. L. Games, and W. J. Pryde, 470.
Spectroscopic studies of organophosphorus compounds. Part I. The constitution of alkylphosphine – carbon disulfide adducts. M. A. A. Beg and M. S. Siddiqui, 608.
Transition metal complexes of N-methyl-γ-butyrolactam. R. J. Niedzielski and G. Znider, 2618.
Urea inclusion compounds of alkenoic acids and alkyl alkenoates. J. Radell and B. W. Brodman, 304.

Natural products

The alkaloids of fumariaceous plants. LII. A new alkaloid, cularicine, and its structure. R. H. F. Manske, 989.
The alkaloids of papaveraceous plants. LIII. *Eschscholtzia californica* Cham. R. H. F. Manske and K. H. Shin, 2180.
The alkaloids of papaveraceous plants. LIV. The structure of eschscholtzine. R. H. F. Manske, K. H. Shin, A. R. Battersby, and D. F. Shaw, 2183.
Biosynthesis of berberine and berberastine. Incorporation of catecholamines. I. Monkovič and I. D. Spenser, 2017.
Biosynthesis of colchicine. Tracer studies with cinnamate-3-^{14}C, methanol-^{14}C, and ornithine-2-^{14}C. R. D. Hill and A. M. Unrau, 709.
Biosynthetic incorporation of one-carbon units into berberine and hydrastine. R. N. Gupta and I. D. Spenser, 133.
Ceanothus alkaloids. I. Isolation, separation, and characterization. E. W. Warnhoff, S. K. Pradhan, and J. C. N. Ma, 2594.

Chasmanine and its structure. O. Achmatowicz, Jr., Y. Tsuda, L. Marion, T. Okamoto, M. Natsume, H.-H. Chang, and K. Kajima, 825.
A chemical study of *Bocconia latisepala* Wats. X. A. Dominguez, J. G. Delgado, A. Monroy C., L. G. Armendariz, A. Alcala, J. Quevedo, and P. Rojas, 679.
Desert plant constituents. II. Ocotillol: an intermediate in the oxidation of hydroxy isoöctenyl side chains. E. W. Warnhoff and C. M. M. Halls, 3311.
Essential oils and their constituents. XXVII. Composition of oil of gingergrass. M. C. Nigam, I. C. Nigam, and L. Levi, 521.
Essential oils and their constituents. XXIX. The essential oil of marihuana: composition of genuine Indian *Cannabis sativa* L. M. C. Nigam, K. L. Handa, I. C. Nigam, and L. Levi, 3372.
An exocellular mannan, alternately linked 1,3-β and 1,4-β from *Rhodotorula glutinis*. P. A. J. Gorin, K. Horitsu, and J. F. T. Spencer, 950.
Fatty acids of *Catalpa bignonioides* and other Bignoniaceae seed oils. M. J. Chisholm and C. Y. Hopkins, 2566.
Gas–liquid chromatography of terpenes. Part XIII. The volatile oil of the leaves of *Juniperus horizontalis* Moench. F. M. Couchman and E. von Rudloff, 1017.
Glucoputranjivin. M. H. Benn and D. Meakin, 1874.
The identity of oxyjavanicin with fusarubin. G. P. Arsenault, 2423.
Lignin model compounds. III. Detection of 1-hydroxy-1-(4-hydroxy-3-methoxyphenyl)-2-propanone in the acidolysis products of lignin. J. A. F. Gardner and H. MacLean, 2421.
Mass spectra of some furoquinoline alkaloids. D. M. Clugston and D. B. MacLean, 2516.
Occurrence in seed oils of some fatty acids with conjugated unsaturation. C. Y. Hopkins and M. J. Chisholm, 3159.
The optical activity of fucoxanthin. N. J. Antia, 302.
The oxidation of diterpenoid alkaloids. O. Achmatowicz, Jr., Y. Tsuda, and L. Marion, 2336.
The oxygenated fatty acids from the oil of the spores of *Lycopodium* species. A. P. Tulloch, 415.
Some aspects of the chemistry of catharanthine and cleavamine. J. P. Kutney, R. T. Brown, and E. Piers, 1545.
Structural studies by mass spectrometry. Determination of the structure of lycofawcine (base L). W. A. Ayer, W. R. Bowman, P. Kebarle, and R. H. Burnell, 328.
The structure of homochasmanine. O. Achmatowicz, Jr. and L. Marion, 1093.
The structure of retamine and the partial synthesis of the (−)-enantiomorph. K. H. Shin, L. Fonzes, and L. Marion, 2012.
Structures of *Chlorobium* chlorophylls (650). J. W. Purdie and A. S. Holt, 3347.
Studies in the biochemistry of microorganisms. Part 117. Sepedonin, a tropolone metabolite of *Sepedonium chrysospermum* Fries. P. V. Divekar, H. Raistrick, T. A. Dobson, and L. C. Vining, 1835.
A study of the pectin present in the bark of amabilis fir (*Abies amabilis*). S. S. Bhattacharjee and T. E. Timell, 758.
The synthesis of glucosinalbin and glucoaubrietin. M. H. Benn, 1.
Terpenoids. VIII. The immediate precursors of helminthosporal and helminthosporol. P. de Mayo, R. E. Williams, and E. Y. Spencer, 1357.
Terpenoids. XII. The structure of chaparrin. T. A. Davidson, T. R. Hollands, P. de Mayo, and M. Nisbet, 2996.
Terpenoids. XIII. The stereochemistry of chaparrin, chaparrol, and related compounds. T. R. Hollands, P. de Mayo, M. Nisbet, and P. Crabbé, 3008.
3,5,8,4′-Tetramethoxyflavone and the constitution of pratoletin. J. S. Chadha, 306.
The water-soluble polysaccharides of dermatophytes. IV. Galactomannans I from *Trichophyton granulosum*, *Trichophyton interdigitale*, *Microsporum quinckeanum*, *Trichophyton rubrum*, and *Trichophyton schönleinii*. C. T. Bishop, M. B. Perry, F. Blank, and F. P. Cooper, 30.

Nuclear Chemistry

Independent yields of ^{124}Sb and ^{126}Sb in thermal neutron induced fission and their implication on the empirical Z_p function. P. O. Strom, G. R. Grant, and A. C. Pappas, 2493.
Mass distribution in thermal neutron fission of ^{239}Pu. D. A. Marsden and L. Yaffe, 249.
Studies on the range of ^{140}Ba in proton-induced fission of ^{238}U and a semi-empirical derivation of a general range–energy relation. S. Mukherji and L. Yaffe, 232.

Organometallic compounds

Addition of fluoroacetylenes to group V hydrides. W. R. Cullen, D. S. Dawson, and G. E. Styan, 3392.
The ammonomercuration of cyclohexene. D. Chow, J. H. Robson, and G. F Wright, 312.
Correlations of proton coupling constants in the cyclopropane ring with electronegativity. Consideration of the proton resonance spectrum of cyclopropyllithium. T. Schaefer, F. Hruska, and G. Kotowycz, 75.
Magnetic studies on copper(II) trifluoroacetate. R. C. Thompson and D. B. W. Yawney, 1240.
Nuclear magnetic resonance spectra and conductivities of some metal acetylacetonates. A. J. Carty, D. G. Tuck, and E. Bullock, 2559.
The oxymercuration of 4-methylenecyclohexanemethanol. N. L. Weinberg and G. F Wright, 24.
Vibrational spectra of some alkylarsonium compounds. W. R. Cullen, G. B. Deacon, and J. H. S. Green, 3193.

Photochemistry

The chemistry of singlet and triplet methylene. R. F. W. Bader and J. I. Generosa, 1631.
Conditions for the photochemical nitration of benzene. D. L. Bunbury, 1714.
An electron spin resonance study of ultraviolet photolyzed solid carbonyl sulfide. D. A. Stiles, R. Kewley, O. P. Strausz, and H. E. Gunning, 2442.

Erratum: Primary process studies by monoisotopic photosensitization on the reactions of Hg $6(^3P_1)$ atoms with alkyl chlorides. J. K. S. Wan, O. P. Strausz, W. F. Allen, and H. E. Gunning, 318.
The Hg $6(^3P_1)$ photosensitization of chlordifluoromethane. M. G. Bellas, O. P. Strausz, and H. E. Gunning, 1022.
The Hg $6(^3P_1)$ photosensitized decomposition of cyclohexene vapor. G. R. De Maré, O. P. Strausz, and H. E. Gunning, 1329.
Hydrogen atom abstraction from ethyleneimine and ethyleneimine-d_4. R. F. Klemm, 2633
Infrared study of the photochemistry of tetramethylcyclobutan-1,3-dione. I. Haller and R. Srinivasan, 3165.
Intramolecular hydrogen transfer in mercury photosensitization of pentene-1. D. W. Placzek and B. S. Rabinovitch, 820.
Iodine-catalyzed recombination of atomic nitrogen. R. A. Young, 3238.
Photochemical synthesis of vinylthiols. O. P. Strausz, T. Hikida, and H. E. Gunning, 717.
Photochemical transformations of some 4′-amino-2-styrylpyridines and their salts. J. L. R. Williams, J. M. Carlson, R. E. Adel, and G. A. Reynolds, 1345.
Photochemistry of electrons trapped in glasses of methyltetrahydrofuran at 77 °K. P. J. Dyne and O. A. Miller, 2696.
The photolysis and the mercury-photosensitized decomposition of hydroxylamine vapor. J. Betts and R. A. Back, 2678.
The photolysis of carbon disulfide and carbon disulfide – oxygen mixtures. M. de Sorgo, A. J. Yarwood, O. P. Strausz, and H. E. Gunning, 1886.
The photolysis of cyclopentanone and cyclobutanone. R. F. Klemm, D. N. Morrison, P. Gilderson, and A. T. Blades, 1934.
Photolysis of hexafluoroazomethane near room temperature. J. R. Dacey, R. F. Mann, and G. O. Pritchard, 3215.
The photolysis of maleic hydrazide: evidence for an intermolecular hydrogen transfer. A. Stoessl, 2430.
Reactions of imino radicals with hydrocarbon gases. J. L. Brash and R. A. Back, 1778.
Reactivities in photosensitized olefin oxidations. K. R. Kopecky and H. J. Reich, 2265.
The role of Hg 6^3P_0 atoms in mercury photosensitization. III. Reactions with Hg 6^1S_0 atoms. J. E. McAlduff and D. J. Le Roy, 2279.

Physical properties

Conductances and surface tensions of aqueous solutions of sodium decanoate, sodium laurate, and sodium myristate, at 25° and 35°. A. N. Campbell and G. R. Lakshminarayanan, 1729.
Deshydratation des échangeurs de cations. W. R. Heumann and F. D. Rochon, 3483.
The determination of the saturation vapor pressure of solid hydroxylamine using a piston pressure gauge. R. A. Back and J. Betts, 2157.
Diffusion in multicomponent gaseous mixtures. Part 2. Diffusion of xenon-133 in binary mixtures of xenon with helium, neon, argon, and krypton. H. Watts, 431.
Erratum: Ultrasonic absorption in critical binary liquid systems. II. P. Kruus, 1892.
Hydration of purines, pyrimidines, nucleosides, and nucleotides. M. Falk, 314.
The ionization behavior of amides in concentrated sulfuric acids. II. Applications of the H_A function to rates and equilibria. K. Yates and J. B. Stevens, 529.
Light scattering of a critical binary liquid mixture: triethylamine–water. B. Chu and W. P. Kao, 1803.
Magnetic studies on copper(II) trifluoroacetate. R. C. Thompson and D. B. W. Yawney, 1240.
Numerical solutions of Smoluchowski's equations for the coagulation of uncharged aerosols. J. M. Beeckmans, 2312.
On the relationship between equilibrium pressures and the phase diagram of a reactive system. The systems: $NaCl–Na_2ZrCl_6$, $KCl–K_2ZrCl_6$, $NaCl–KCl–ZrCl_4$. R. L. Lister and S. N. Flengas, 2947.
The solubility of aluminium in $NaF–AlF_3–Al_2O_3$ melts. J. Thonstad, 3429.
Subsolutions in multicomponent systems: applications to some ternary aqueous acid sulfate systems at univariance. A. J. Sukava, 1036.
Supersonic molecular beams. II. Theory of the formation of supersonic molecular beams. J. P. Valleau and J. M. Deckers, 6.
The system: bismuth–cadmium–mercury. A. N. Campbell and E. M. Kartzmark, 1924.
The thermodynamic properties and phase diagram of the gold–cadmium system by the isopiestic method. L. J. Bartha and W. A. Alexander, 2319.
X-ray study of liquid $AsBr_3$. R. Hoge and J. Trotter, 2692.

Polarography

Simultaneous polarographic determination of small amounts of bismuth and lead in copper-base alloys. C. H. McMaster, 405.

Polymers

The effect of phenols on the polymerization of vinyl acetate. R. A. Bird and K. E. Russell, 2123.
Infrared spectra and structure of polyaldehydes. VI. Polyfluoral. W. K. Busfield and E. Whalley, 2289.
Radiation-induced changes in the unsaturation of polyisoprene. M. A. Golub and J. Danon, 2772.

Radiation chemistry

Charge transfer and electron capture in the radiolysis of aliphatic hydrocarbons. P. J. Dyne, 1080.
Charge transfer in the radiolysis of dilute solutions of hydrocarbons in krypton matrices at 77 °K. J. A. Stone, 809.
Electron spin resonance determination of the radiolytic yields of trapped electrons and other species in an organic glass. D. R. Smith and J. J. Pieroni, 2141.

Erratum: Effects of pH in the γ-radiolysis of aqueous solutions of cysteine and methyl mercaptan. D. A. Armstrong and V. G. Wilkening, 993.
Halogen atom reactions. III. Luminescence from the recombination of bromine atoms. D. B. Gibbs and E. A. Ogryzlo, 1905.
A l.e.t. independent dosimeter based on the chemiluminescent determination of H_2O_2. W. A. Armstrong and W. G. Humphreys, 2576.
Mean lifetime of free radical chains in ^{60}Co γ-irradiated chloral hydrate and bromal hydrate solutions. R. G. McIntosh, R. L. Eager, and J. W. T. Spinks, 3490.
Photochemistry of electrons trapped in glasses of methyltetrahydrofuran at 77 °K. P. J. Dyne and O. A. Miller, 2696.
Radiation chemistry of alkali thiosulfates. R. L. Eager and D. S. Mahadevappa, 614.
Radiation-induced changes in the unsaturation of polyisoprene. M. A. Golub and J. Danon, 2772.
The radiolysis of ethanol. III. Liquid phase. J. J. J. Myron and G. R. Freeman, 381.
The radiolysis of ethanol. IV. Deuterated ethanols in the liquid and gas phases. J. J. J. Myron and G. R. Freeman, 1484.

Solutions
The acidity of some substituted acetonitriles. R. Stewart, J. P. O'Donnell, and K. Bowden, 1225.
Application of the extended Hammett relationship to the ionization constants of substituted anthranilic acids. P. Leggate and G. E. Dunn, 1158.
An approximate determination of the second-stage protonation constant for 2,2′-bipyridyl, 1,10-phenanthroline, and derivatives. W. A. E. McBryde, 3472.
Cadmium species in basic solution. D. E. Ryan, J. R. Dean, and R. M. Cassidy, 999.
Cation exchange in anhydrous ethylenediamine. W. R. Heumann, O. Dionne, and G. Tremblay, 1096.
Effect of electrolyte environment on divalent tartrate ion mobility. J. C. Nichol, D. G. Heikkinen, and G. E. Glass, 1476.
The electrical conductivities of some tetra-*n*-alkylammonium salts in acetonitrile. A. C. Harkness and H. M. Daggett, Jr., 1215.
The H_A acidity function and the mechanism of amide hydrolysis in hydrochloric acid. K. Yates and J. C. Riordan, 2328.
Heats of mixing and heat capacities in the system: acetic acid – chloroform – water, at 25°. A. N. Campbell and J. M. T. M. Gieskes, 1004.
The H_- function in aqueous alcohols containing base. K. Bowden, 2624.
The ionization behavior of amides in concentrated sulfuric acids. II. Applications of the H_A function to rates and equilibria. K. Yates and J. B. Stevens, 529.
The ionization of some typical weak bases in concentrated perchloric acid. K. Yates and H. Wai, 2131.
Ion–solvent interaction in mixed solvents. Part III. The molar refraction of electrolytes. J. Padova, 458.
A quasi-crystalline model of diffusion in ternary liquid systems. J. E. Lane and J. S. Kirkaldy, 1812.
Salting-in by quaternary ammonium salts. J. E. Desnoyers, G. E. Pelletier, and C. Jolicoeur, 3232.
Some heats of solution in light and heavy water. D. H. Davies and G. C. Benson, 3100.
Subsolutions in multicomponent systems: applications to some ternary aqueous acid sulfate systems at univariance. A. J. Sukava, 1036.
Thermodynamic excess functions in the systems acetic acid – water and acetic acid – chloroform. J. M. T. M. Gieskes, 2448.
Ultraviolet study of the ionization of bisulfate ion. J. T. Edward and I. C. Wang, 2867.

Spectroscopy
Basicities of methylthio- and phenylthio-anilines. I. D. Rae, 2614.
A comparison of the Raman crystal and solution spectra of the hexaniobate and hexatantalate ions. R. S. Tobias, 1222.
Deuterium isotope effect in vacuum-ultraviolet absorption coefficients of water and methane. A. H. Laufer and J. R. McNesby, 3487.
Diffuseness in electronic spectra. The vapor spectrum of anthracene. J. P. Byrne and I. G. Ross, 3253.
Direct observation of $A^2\Sigma_u^+$ nitrogen molecules in the N–I_2 flame. D. I. Walton, M. J. McEwan, and L. F. Philips, 3095.
Enthalpies of intramolecular halogen–hydroxyl interactions. A. W. Baker and A. T. Shulgin, 650.
Infrared emission spectra of fatty acids on steel surfaces. M. J. D. Low and H. Inoue, 2047.
Infrared spectra and structure of polyaldehydes. VI. Polyfluoral. W. K. Busfield and E. Whalley, 2289.
The infrared spectra of some titanium(IV) complexes with primary diamines. D. Horley and E. G. Torrible, 3201.
The infrared spectrum of ammonia adsorbed on Cabosil silica powder. N. W. Cant and L. H. Little, 1252.
Infrared study of the photochemistry of tetramethylcyclobutan-1,3-dione. I. Haller and R. Srinivasan, 3165.
Iodine-catalyzed recombination of atomic nitrogen. R. A. Young, 3238.
Light absorption studies. Part XXI. The ultraviolet and infrared absorption of *o*-alkyl- and *o,o′*-dialkyl-substituted anisoles. A. Balasubramanian, J. C. Dearden, W. F. Forbes, and (in part) N. F. Cheetham, 2603.
Localization of the C=Se vibration in the infrared spectra of selenosemicarbazones. B. A. Gingras, T. Suprunchuk, and C. H. Bayley, 1650.
Mass spectra of some furoquinoline alkaloids. D. M. Clugston and D. B. MacLean, 2516.
Nuclear magnetic resonance and infrared studies of acylated imidazolidinones and imidazolidinethiones. R. Greenhalgh and M. A. Weinberger, 3340.
Protonated carbonyl groups. V. α-Pyridone salts. D. Cook, 749.

α-Pyridone complexes and their infrared spectra. D. Cook, 741.
Raman spectrum of crystalline and liquid SO_3. A. Anderson and R. Savoie, 2271.
Some anomalous carbonyl stretching frequencies in steroid infrared spectra. R. N. Jones and J. B. DiGiorgio, 182.
Spectral properties of *p*-substituted benzoyltriphenylsilanes. A. G. Brook, R. Kivisikk, and G. E. LeGrow, 1175.
Le spectre infrarouge de l'ozonide d'ammonium et la structure de l'ion O_3^-. K. Herman and P. A. Giguère, 1746.
Spectres infrarouges de composés riches en azote. M. Tremblay, 1154.
Spectroscopic studies of alcohols. V. Intramolecular hydrogen bonds in 2-cyanoethanol and in some nitro-alcohols. P. J. Krueger and H. D. Mettee, 2888.
Spectroscopic studies of alcohols. VI. Intramolecular hydrogen bonds in ethanolamine and its *O*- and *N*-methyl derivatives. P. J. Krueger and H. D. Mettee, 2970.
Structural studies by mass spectrometry. Determination of the structure of lycofawcine (base L). W. A. Ayer, W. R. Bowman, P. Kebarle, and R. H. Burnell, 328.
The structure of aminopyrine salts. D. Cook, 3322.
Structure vibrationnelle des spectres d'absorption dans l'ultraviolet de quelques dérivés halogénés du benzène. P. Pesteil, H. F. Shurvell, and L. Pesteil, 3133.
The sulfur–chlorine stretching band in sulfonyl chlorides. J. F. King and D. J. H. Smith, 1870.
Sur le spectre infrarouge de SO_2 à haute température. P. A. Giguère and R. Savoie, 2357.
Synthesis of the trimethoxyphenylpropenes. A. T. Shulgin, 3437.
Theoretical studies on the electronic spectra of substituted aromatic molecules. Part III. Semiempirical SCF calculations for polycyclic alternant hydrocarbons. J. E. Bloor and N. Brearley, 1761.
Thermal stability of an adsorbed array of charges in the Einstein approximation. J. R. Macdonald and C. A. Barlow, Jr., 2985.
Thermodynamic functions of the partially deuterated methyl halides as anharmonic oscillators. J. R. Riter, Jr. and M. C. Goldberg, 2688.
The ultraviolet spectra of ribonucleic acids in solid state and in solution. M. Falk, 3151.
Ultraviolet study of the ionization of bisulfate ion. J. T. Edward and I. C. Wang, 2867.
Vibrational spectra of some alkylarsonium compounds. W. R. Cullen, G. B. Deacon, and J. H. S. Green, 3193.
The yield of singlet oxygen in the reaction of chlorine with hydrogen peroxide. R. J. Browne and E. A. Ogryzlo, 2915.

Surfaces

The adsorption of krypton and ethylene on evaporated films of magnesium. D. M. Young and C. D. Anderson, 309.
Carbonyl and thiocarbonyl compounds. IX. Synthesis of benzoxanthene ethers by the action of tetrahalo-*o*-benzoquinones. N. Latif and I. Fathy, 1246.
Chemical structure and adsorption of organic molecules at the polarized mercury–electrolyte interface. R. G. Barradas and P. G. Hamilton, 2468.
Conductances and surface tensions of aqueous solutions of sodium decanoate, sodium laurate, and sodium myristate, at 25° and 35°. A. N. Campbell and G. R. Lakshminarayanan, 1729.
Considerations of adsorbed ionic intermediates on the AgO/Ag_2O electrode in aqueous alkaline solution. R. G. Barradas and G. H. Fraser, 446.
The diffuse layer correction to the discrete-ion effect in electric double layer theory. S. Levine, J. Mingins, and G. M. Bell, 2834.
Effects of the electronic band shape of palladium metal on the proton model for hydrogen absorption. J. W. Simons and T. B. Flanagan, 1665.
Electrocrystallization. I. Surface diffusion. S. K. Rangarajan, 1052.
The flow of gases through microporous carbon. R. F. Bartholomew and E. A. Flood, 1968.
Infrared emission spectra of fatty acids on steel surfaces. M. J. D. Low and H. Inoue, 2047.
The infrared spectrum of ammonia adsorbed on Cabosil silica powder. N. W. Cant and L. H. Little, 1252.
Isomeric sydnones. I. The reactions of 1- and 2-benzoyl-1-methylhydrazines and phosgene. C. Ainsworth, 1607.
Slip flow in long, single capillaries. Part II. Steady-state flow and specular reflection. R. M. Barrer and D. Nicholson, 896.
Slip flow in long, single capillaries. Part III. The transient state of flow. R. M. Barrer and D. Nicholson, 913.
Surface chemistry and catalytic properties of boron phosphate. 1. Surface area and acidity. J. B. Moffat and G. L. Goltz, 1680.
Surface chemistry and catalytic properties of boron phosphate. II. A note on the formation of paramagnetic species with adsorbed aromatic compounds. J. B. Moffat and M. A. Haleem, 3495.
Synthesis of derivatives of 1,2-dichloro-4-benzenesulfonamido-5-nitrobenzene and their use in the chemotherapy of spontaneous cancers. D. W. Woolley and T. Van Der Hoeven, 1454.

Synthesis of organic compounds

Aliphatic chemistry of fluorene. Part X. 2-Phenylindolenine-3-spiro-9′-fluorene. P. M. G. Bavin, 2919.
Aliphatic vicinal fluorobromides: some preparations and reactions. F. L. M. Pattison, D. A. V. Peters, and F. H. Dean, 1689.
The ammonomercuration of cyclohexene. D. Chow, J. H. Robson, and G. F Wright, 3?2.
Anomalous reactions in attempts to prepare 3-alkylthioindoles. R. V. Jardine and R. K. Brown, 1298.
Chemistry of mybomycin. II. Synthesis of 4,5-dimethyl-2,7-dioxo-1,2,7,8-tetrahydro-1,8-diazaanthracene. G. Leadbetter and K. L. Rinehart, Jr., 1625.

The chemistry of the aminochromes. Part VIII. The preparation and properties of 4- and 7-methyladrenochrome. R. A. Heacock and O. Hutzinger, 2535.
Concerning the preparation of *p*-allylphenol from safrole by sodium – liquid ammonia reduction. M. J. Baldwin and R. K. Brown, 2621.
The condensation of phosphonothioic and phosphonic dichlorides with *o*-diamines. R. L. Dannley and A. Grava, 3377.
Demjanov rearrangement of 9-xanthenemethylamine. S. N. Alam and D. B. MacLean, 3433.
1,4-Dimethylbicyclo[2.2.1]heptane derivatives. P. Yates and T. R. Lynch, 2306.
Erratum: New nitrochalcones. VII. T. Szell, A. M. Eastham, and G. Sipos, 2134.
Erratum: The synthesis and reactions of divinyl carbonium ions. T. S. Sorensen, 2644.
Ester hydrazones as possible precursors to alkoxydiazoalkanes. I. The synthesis of ester (*p*-tolylsulfonyl)hydrazones and their decomposition in protic solvents to give mixed acetals. R. J. Crawford and R. Raap, 126.
Ester hydrazones as possible precursors to alkoxydiazoalkanes. II. The decomposition of ester (*p*-tolylsulfonyl)hydrazone salts in aprotic solvents. R. J. Crawford and R. Raap, 356.
Études conformationnelles en serie cyclopentanique. I. La *tert*-butyl-3 cyclopentanone et ses dérivés. J.-C. Richer and C. Gilardeau, 3419.
The Feist synthesis of pyrrole-3-carboxylic esters. D. M. McKinnon, 2628.
On the formation of a pyrazoline from acetone toluenesulfonyl hydrazone. Y.-C. Lin and G. Just, 3115.
Higher homologues from pyrroles and dipyrrylmethenes. S. F. MacDonald and A. Markovac, 3247.
Isomeric 1,3-cyclopentanedicarboxylic acids from the oxidative ozonization of norbornene. S. C. Temin and M. E. Baum, 705.
3-Mercaptoquinuclidine. K. B. Shaw, 3112.
A new synthesis of alkyl fluorides. The pyrolysis of 2-alkylpseudouronium fluorides and fluoroborates. J. H. Amin, J. Newton, and F. L. M. Pattison, 3173.
Organic sulfur compounds. Part I. Benzothiazine hydroxamic acids and related compounds. R. T. Coutts, H. W. Peel, and E. M. Smith, 3221.
Ortho-chlorobenzalmalonamide and related compounds. R. P. Mariella and T. Conway, 2426.
Photochemical synthesis of vinylthiols. O. P. Strausz, T. Hikida, and H. E. Gunning, 717.
The preparation of 3-alkylthioindoles. R. V. Jardine and R. K. Brown, 1293.
Preparation of antidotes for anticholinesterase poisoning. III. Esters of 1-arylcycloalkanecarboxylic acids. J. H. Parkkari, R. A. B. Bannard, and I. W. Coleman, 3119.
The preparation of a trivinyl carbonium ion. T. S. Sorensen, 2744.
Preparation of 4,4″-bis(diphenylamines) by the Chapman rearrangement. R. Barclay, Jr., 2125.
Preparation of α-fluoro-γ-aminoacids. R. L. Buchanan and F. L. M. Pattison, 3466.
The preparation of thioacetals from orthothioboric esters. F. Bessette, J. Brault, and J. M. Lalancette, 307.
The pyrolysis of oximes of some gamma cyano- and gamma nitro-ketones. C. F. H. Allen, 2486.
Quantitative preparation of chloro-and bromophthalazines. A. Hirsch and D. Orphanos, 2708.
Quinoxaline derivatives. VIII. The effect of electron-donating groups on the formation of certain quinoxalinecarboxyanilide *N*-oxides and their rearrangement. Y. Ahmad, M. S. Habib, M. Iqbal, M. I. Qureshi, and Ziauddin, 3424.
Reaction of aralkyl ketone oximes with carbon monoxide and hydrogen to yield formamides and secondary amines. A. Rosenthal and M. Yalpani, 711.
Reaction of aralkyl ketone phenylhydrazones with carbon monoxide; thermal indolization of aralkyl ketone phenylhydrazones. A. Rosenthal and M. Yalpani, 3449.
Reactions of ethyldiazoacetate with cyclopentadiene. Synthesis of the epimeric ethyl bicyclo[3.1.0]hex-2-ene-6-carboxylates. J. Warkentin, E. Singleton, and J. F. Edgar, 3456.
Reactions of phenyl-substituted heterocyclic compounds. VI. Nitration of 5-phenylisoxazole. B. M. Lynch and L. Shiu, 2117.
A series of model compounds for the study of aromatic reactions. S. Safe and R. Y. Moir, 337.
Spectral properties of *p*-substituted benzoyltriphenylsilanes. A. G. Brook, R. Kivisikk, and G. E. LeGrow, 1175.
The stereochemistry of the tetrahydropimaric acids. J. W. ApSimon, P. V. Demarco, and J. Lemke, 2793.
Stereoselective synthesis of a dibenzo[*a*,*g*]quinolizine analog of 18-hydroxyepialloyohimbane. B. Belleau and J. Puranen, 2551.
Stereospecific synthesis of a dibenzo[*a*,*g*]quinolizine analog of 18-hydroxyalloyohimbane. B. Belleau and D. Dvornik, 2545.
The structure of retamine and the partial synthesis of the (−)-enantiomorph. K. H. Shin, L. Fonzes, and L. Marion, 2012.
Studies in the cyclization of the products of Stobbe condensation with propiophenone. A. M. El-Abbady and S. H. Doss, 2408.
Studies in the pyrroline series. V. 3,3-Dimethyl-1-pyrroline-1-oxide. R. Bonnett, S. C. Ho, and J. A. Raleigh, 2717.
Substitutions en série naphtalènique. II. Dérivés du diméthoxy-2,7-naphtalène. J.-C. Richer and Y. Pépin, 3443.
Sur les produits de substitution du diméthoxy-1,7 naphtalène. J.-C. Richer and C. Lamarre, 715.
Synthèses de peptides contenant des thioacides. C. Berse and G. Dupuis, 2174.
Synthèses de la *tert*-butyl-4 dimethyl-2,2 cyclohexanone et de ses dérivés. J.-C. Richer and G. Perrault, 18.
Syntheses with 5-dibromomethyl- and 5-formyl-pyrromethenes. A. Markovac and S. F. MacDonald, 3364.
Synthesis and reactivity of some ortho-substituted diphenyl sulfones. O. F. Bennett, 1880.
The synthesis of 2-aminobenzenethiol hydrochlorides. R. L. Dannley and D. A. Zazaris, 2610.
Synthesis of 1-aryl substituted 9*H*-pyrido[3,4-*b*]indoles. W. A. Skinner and R. M. Parkhurst, 2251.
Synthesis of 2,2-disubstituted-5-cyanocyclopentanones. S. S. Kulp, V. B. Fish, and N. R. Easton, 2512.

The synthesis of glucosinalbin and glucoaubrietin. M. H. Benn, 1.
Synthesis of isotopically labelled olefins via the Wittig reaction. J. G. Atkinson, M. H. Fisher, D. Horley, A. T. Morse, R. S. Stuart, and E. Synnes, 1614.
The synthesis of α-monofluoroalkanoic acids. F. L. M. Pattison, R. L. Buchanan, and F. H. Dean, 1700.
The synthesis of potentially physiologically active β-phenylethylamines. Part III. Some β-alkoxy-β-(3,4-dihydroxyphenyl)ethylamines. R. A. Heacock, O. Hutzinger, and B. D. Scott, 2437.
Synthesis of some alpha-substituted cystines. R. J. Thibert, J. F. G. Diederich, and K. G. Rutherford, 206.
Synthesis of some tetrazole salts. M. Tremblay, 1230.
Synthesis of the isomeric methyl *vic*-bromofluoropropanoates. F. H. Dean and F. L. M. Pattison, 2415.
Synthesis of the trimethoxyphenylpropenes. A. T. Shulgin, 3437.
A synthesis of 2,2,4-trimethyl-4-hydroxytetrahydrofuran, a product of the photolysis of 4-methyl-4-methoxy-2-pentanone. M. A. Gianturco and P. Friedel, 2121.
The use of dimethylformamide and of dimethyl sulfoxide in the preparation of 2,4-dinitrophenylhydrazones. J. Parrick and J. W. Rasburn, 3453.

Terpenes and steroids

Azasteroidal hormone analogues related to doisynolic acid. N. A. Nelson and J. M. Schuck, 1527.
11α,12α-Epoxy-3,20-dioxopregnane. P. Ziegler, 988.
Isopimaric acid. W. Antkowiak, O. E. Edwards, R. Howe, and J. W. ApSimon, 1257.
Potential anticancer agents. I. Urethane-type nitrogen mustards of some synthetic estrogens. E. Grant and I. Niculescu-Duvåz, 1227.
La réaction du pentachlorure de phosphore sur les acyloxy-3β-Δ⁴-ceto-6 stéroides. I. Série du pregnane. Y. Lefebvre and R. Gaudry, 1990.
Steroids and related natural products. XXV. Photochemical transformation of 3β-nitrito-5α-lanostane. G. R. Pettit, R. E. Kadunce, P. Sunder-Plassmann, and J. Occolowitz, 2872.
Synthesis of 8-aza-D-homo-18-norestrone methyl ether. N. A. Nelson and Y. Tamura, 1323.
Terpenoids. X. Pre-senegenin, a quite normal triterpenoid. J. J. Dugan and P. de Mayo, 2033.
Terpenoids. XII. The structure of chaparrin. T. A. Davidson, T. R. Hollands, P. de Mayo, and M. Nisbet, 2996.
Terpenoids. XIII. The stereochemistry of chaparrin, chaparrol, and related compounds. T. R. Hollands, P. de Mayo, M. Nisbet, and P. Crabbé, 3008.

Theoretical studies

The diffuse layer correction to the discrete-ion effect in electric double layer theory. S. Levine, J. Mingins, and G. M. Bell, 2834.
Molecular force field for sulfur tetrafluoride. M. G. K. Pillai, K. Ramaswamy, and R. Pichai, 463.
Numerical solutions of Smoluchowski's equations for the coagulation of uncharged aerosols. J. M. Beeckmans, 2312.
A quantum-theoretical study of some aromatic nitriles by the semiempirical LCAO–SCF–MO method. H. E. Popkie and J. B. Moffat, 624.
A quasi-crystalline model of diffusion in ternary liquid systems. J. E. Lane and J. S. Kirkaldy, 1812.
Semiempirical SCF calculations on azulene and its singly charged ions. J. E. Bloor, 3026.
Semiempirical SCF–LCAO–MO treatment of thiophene, furan, and pyrrole. N. Solony, F. W. Birss, and J. B. Greenshields, 1569.
Some comments on Craig's rules. R. A. Abramovitch and K. L. McEwen, 2616.
Theoretical studies on the electronic spectra of substituted aromatic molecules. Part III. Semiempirical SCF calculations for polycyclic alternant hydrocarbons. J. E. Bloor and N. Brearley 1761.
Thermal stability of an adsorbed array of charges in the Einstein approximation. J. R. Macdonald and C. A. Barlow Jr., 2985.

Thermochemistry

An adiabatic solution calorimeter used for measuring the molar excess enthalpy of the system carbon tetrachloride – benzene at 25 °C. J. E. Bennett and G. C. Benson, 1912.
Application of differential thermal analysis to the dissociation of MnO_2 and Mn_2O_3. T. Matsushima and W. J. Thoburn, 1723.
Effect of water vapor on the formation of $CaSO_4.\frac{1}{2}H_2O$ modifications. R. A. Kuntze, 2522.
Enthalpies of intramolecular halogen–hydroxyl interactions. A. W. Baker and A. T. Shulgin, 650.
Entropy differences for some related pairs of complex ions. J. Lin and W. G. Breck, 766.
The heat of formation of boron tribromide – acetonitrile. J. M. Miller and M. Onyszchuk, 1877.
Heats of mixing and heat capacities in the system: acetic acid – chloroform – water, at 25°. A. N. Campbell and J. M. T. M. Gieskes, 1004.
The heat of sublimation and heat of vaporization of trimethylthallium. S. J. Price and M. G. Jacko, 3481.
High energy modifications of the hydrates of zinc sulfate. J. W. S. Jamieson, R. A. LaMontagne, B. A. Pattern, and G. R. Brown, 3129.
Possible calorimetric method for measurement of the ligand field splitting energies for the hexaaquo cations of some transition elements. J. W. S. Jamieson, G. R. Brown, D. W. Gruener, R. V. Peiluck, and R. A. LaMontagne, 2148.
Some heats of solution in light and heavy water. D. H. Davies and G. C. Benson, 3100.
Thermodynamic excess functions in the systems acetic acid – water and acetic acid – chloroform. J. M. T. M. Gieskes, 2448.
Thermodynamic functions of the partially deuterated methyl halides as anharmonic oscillators. J. R. Riter, Jr. and M. C. Goldberg, 2688.
